Integer Programming and Combinatorial Optimization Friedrich Eisenbrand, Bruce Shepherd, 2010-06-09 The idea of a refereed conference for the mathematical programming community was proposed by Ravi Kannan and William Pulleyblank to the Mathematical Programming Society MPS in the late 1980s Thus IPCO was born and MPS has sponsored the conference as one of its main events since IPCO I at the University of Waterloo in 1990 The conference has become the main forum for recent results in Integer Programming and Combinatorial Optimization in the non Symposium years This volume compiles the papers presented at IPCO XIV held June 9 11 2010 at EPFL in Lausanne The scope of papers considered for IPCO XIV is likely broader than at IPCO I This is sometimes due to the wealth of new questions and directions brought from related areas It can also be due to the successful application of math programming techniques to models not traditionally considered In any case the interest in IPCO is greater than ever and this is reflected in both the number 135 and quality of the submissions The Programme Committee with 13 members was also IPCO's largest We thank the members of the committee as well as their sub-reviewers for their exceptional and time-consuming work and especially during the online committee meeting held over January The process resulted in the selection of 34 excellent research papers which were presented in non-parallel sessions over three days in Lausanne Unavoidably this has meant that many excellent submissions were not able to be included
