Department of Agricultural Education,1964 **Student Learning and Academic Understanding** Noel Entwistle,2018-06-09 The research described in *Student Learning and Academic Understanding* had its origins in the pioneering work of Ausubel Bruner and McKeachie and followed two complementary lines of development The first line extended the ideas of Marton on approaches to learning through an inventory designed to assess these approaches among large samples of students and using in depth interviews with students about their experiences of academic understanding The second line drew on a range of studies to explore the influences of university teaching and the whole teaching learning environment on the quality of student learning Taking the research as a whole shows the value of complementary research approaches to describing student learning while the findings brought together in the final chapter suggest ways of supporting deep approaches and the development of personal academic understanding among students *Student Learning and Academic Understanding* covers a wide range of concepts that have emerged from interviews in which students use their own experiences to describe how they study and what they find most useful in developing an academic understanding of their own These concepts differ from the traditional psychological concepts by being focused on the specific contexts of university and college although they are also relevant to the later stages of school education
