**Social and Labour Issues in Small-scale Mines** Norman Jennings,1999 Income inequalities have been growing significantly within countries over the past two decades or so This new report presents a timely assessment of this issue based on new data and economic analysis and with full technical annexes It looks at the extent of this phenomenon and its sustainability analysing factors at work and examining the extent to which it may worsen as a result of the ongoing food and financial crises The report sheds light on the causes of excessive inequality and in particular the possible role of financial market deregulation It also examines the extent to which traditional policies and institutions can still address excessive market driven inequalities and whether traditional redistribution systems are being eroded as a result of a general trend towards lower taxation on high incomes In conclusion the report considers policy reforms that could reduce the risk of rising excessive inequalities while at the same time maintaining economic dynamism

**Small-scale Mining** Ajoy K. Ghose,1994 Rural-Urban Dynamics Jytte Agergaard,Niels Fold,Katherine Gough,2009-09-11 It has increasingly been recognised that rural and urban areas are inextricably interlinked This book adopts a fresh approach to the issue of rural urban dynamics through a study of the changing nature of livelihoods mobility and markets in ten study sites across four countries of Africa and Asia Building on detailed fieldwork conducted in Ghana Tanzania Vietnam and Thailand the authors explore how settlements and livelihoods are being transformed as long term inhabitants and recent migrants embrace new economic activities many of which are linked to global markets The book is structured around the concept of frontier which is conceptualized as being a dynamic space where the forces of economic demographic and social change are brought to bear The study sites include agricultural frontiers coffee cocoa pineapples and fresh fruit handicraft and manufacturing frontiers and mining frontiers gold and diamonds In all of the cases global value chain dynamics have played a pivotal role in shaping local livelihoods Some settlements are developing into new urban centres whilst others are suffering from a boom and bust experience due to the unreliability of export markets The similarities and differences between the frontier settlements are drawn out by comparing frontiers of similar types and by highlighting the theoretical and policy implications of the findings from all the frontier types The originality of the book lies in its combination of conceptual clarity methodological coherence and empirical richness By combining detailed empirical findings with theoretical insight from debates on livelihoods global value chains mobility patterns settlement dynamics and rural urban relations the book sheds new light on these issues within an overall framework of development trajectories in Africa and Asia Given scholars and international agencies current interest in the spatial dimensions of economic development this contribution is particularly timely with its fresh geographical approach to development issues this book is a pertinent and authoritative read for anyone researching or learning in the field of development

Compendium on Best Practices in Small-scale Mining in Africa ,2002 **Between the Plough and the Pick** Kuntala Lahiri-Dutt,2018-03-01 y global social agrarian and political changes whilst underlining the roles that local social political historical contexts play in shaping mineral extractive processes and practices It shows that the people who are engaged in these mining practices are often the poorest and most exploited labourers erstwhile peasants caught in the vortex

of global change who perform the most insecure and dangerous tasks Although these people are located at the margins of mainstream economic life they collectively produce enormous amounts of diverse material commodities and find a livelihood and often a pathway out of oppressive poverty The contributions to this book bring these people to the forefront of debates on resource politics The contributors are international scholars and practitioners who explore the complexities in the histories in labour and production practices the forces driving such mining the creative agency and capacities of these miners as well as the human and environmental costs of ASM They show how these informal artisanal and small scale miners are inextricably engaged with or bound to global commodity values are intimately involved in the production of new extractive territories and rural economies and how their labour reshapes agrarian communities and landscapes of resource access and control This book drives home the understanding that collectively this social and economic milieu redefines our conceptualisation of resource politics mineral dependent livelihoods extractive geographies of resources and commodities and their multiple meanings

**Examining the ‘Golden’ Practices of Small-Scale Mining** George Okyere Ofori,2022-11-25 Scholarship on artisanal and small scale mining ASM has often portrayed mining regions as informal zones that suffer from environmental degradation problems Water pollution and degraded landscapes for example have long been noted as the inevitable consequence of the operations of ASM Such insistence on the institutional absences of ASM zones has dovetailed with a lack of academic attention to some of the golden mining practices taking place there Thus this work seeks to re examine the topic of development in ASM The findings suggest that small scale miners contrary to popular perception could be caretakers of the environment In addition emphasizing how the dynamic interplay between resources and environmental demands may come to support public policy the findings illustrate contrary to the dominant narrative how the activities of small scale mining operators can engender a win win situation for both mining companies and local mining communities
