Excerpt from The Correct Pronunciation of Latin According to Roman Usage
Setting aside the consideration of accents which also have great weight in phonetics it is quite certain that even during the golden period the language was not uniform for the substrata particularly in the cities along the coasts in the Lazio district and in upper Italy Along the coasts the influence of the Greek was strongly felt in the Lazio the Etruscan and in upper Italy the Gallic The same applies to the Italian language It is spoken well by all the cultured people of the Peninsula but their pronunciation differs slightly or to a greater degree according to the region to which they belong For example the Tuscan pronunciation of Italian is different from the Roman and this again is quite distinct from the Neapolitan or Sicilian We have the same condition in America where English is pronounced somewhat differently than in England and where the East West and South have their individual pronunciations and colloquialisms It was previously stated that the Latin pronunciation closest to the ancient is the Roman and therefore to be preferred May we offer the following reasons About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Excerpt from *The Roman Pronunciation of Latin Why We Use It and How to Use It* The argument brought against the Roman pronunciation of Latin is twofold the impossibility of perfect theoretical knowledge and the difficulty of practical attainment If to know the main features of the classic pronunciation of Latin were impossible then our obvious course would be to refuse the attempt to regard the language as in reality dead and to make no pretence of reading it This is in fact what the English scholars generally do But if we may know substantially the sounds of the tongue in which Cicero spoke and Horace sung shall we give up the delights of the melody and the rhythm and content ourselves with the thought form Poetry especially does not exist apart from sound sense alone will not constitute it nor even sense and form without sound But if it is true that the task of practical acquisition is if not impossible extremely difficult the work of a lifetime as the objectors say do the results justify the expenditure of time and labor The position of the English speaking peoples is not the same in this as that of Europeans Europeans have not the same necessity to urge them to the Roman pronunciation About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *The Roman Pronunciation of Latin* FRANCES ELLEN LORD, 2025-03-28
