Proceedings of the International Conference on Sustainability Innovation in Computing and Engineering (ICSICE 24) S. Kannadhasan,P. Sivakumar,T. Saravanan,S. Senthil Kumar,2025-06-24 This is an open access book The International Conference on Sustainability Innovation in Computing and Engineering is a distinguished event that brings together leading experts researchers practitioners and innovators to explore the transformative role of computing and engineering in advancing sustainable solutions In today s world where environmental challenges are intensifying the need for technological innovation in addressing sustainability issues has never been more urgent This conference serves as a dynamic platform for sharing groundbreaking research showcasing innovative technologies and fostering cross disciplinary collaborations to accelerate sustainable development With a focus on integrating sustainability into the core of computing and engineering practices this conference will delve into

a wide array of topics such as sustainable computing technologies energy efficient systems green engineering practices and the role of data science in promoting sustainability It will also highlight the latest advancements in areas like artificial intelligence smart systems and digital solutions that contribute to environmental stewardship and social equity The conference aims to bridge the gap between theoretical research and practical application empowering participants to develop actionable strategies and innovative solutions that can be deployed in real world scenarios By facilitating robust discussions and knowledge exchange the conference seeks to inspire new ideas foster collaboration and catalyze the development of technologies that not only enhance efficiency and performance but also contribute to a more sustainable future It is an honor to host a gathering of visionary leaders in computing and engineering whose expertise and insights will guide the global movement toward a greener more sustainable world

Recent Trends in Blockchain for Information Systems Security and Privacy Amit Kumar Tyagi,Ajith Abraham,2021-11-23 Blockchain technology is an emerging distributed decentralized architecture and computing paradigm which has accelerated the development and application of cloud fog and edge computing artificial intelligence cyber physical systems social networking crowdsourcing and crowdsensing 5g trust management and finance and other many useful sectors Nowadays the primary blockchain technology uses are in information systems to keep information secure and private However many threats and vulnerabilities are facing blockchain in the past decade such 51% attacks double spending attacks etc The popularity and rapid development of blockchain brings many technical and regulatory challenges for research and academic communities The main goal of this book is to encourage both researchers and practitioners of Blockchain technology to share and exchange their experiences and recent studies between academia and industry The reader will be provided with the most up to date knowledge of blockchain in mainstream areas of security and privacy in the decentralized domain which is timely and essential this is due to the fact that the distributed and p2p applications are increasing day by day and the attackers adopt new mechanisms to threaten the security and privacy of the users in those environments This book provides a detailed explanation of security and privacy with respect to blockchain for information systems and will be an essential resource for students researchers and scientists studying blockchain uses in information systems and those wanting to explore the current state of play

The Impact of Institutional Investors' Investment in Bitcoin on its Future ,2023-10-13 Bachelor Thesis from the year 2023 in the subject Business economics Banking Stock Exchanges Insurance Accounting grade 1 0 Munich University of Applied Sciences language English abstract The primary objective of this research is to analyze the impact of institutional investors on the future of Bitcoin By investigating the relationship between institutional investors intentions and theoretical aspects of the Bitcoin ecosystem s characteristics a clear overview of the current situation is enabled and provide insights into the potential implications for the future development of Bitcoin The case studies on prominent institutional adopting Bitcoin are required to identify the purpose of their investment and cluster these into groups Specifically the research seeks to achieve

the following objectives Evaluate the impact of institutional investors on the asset s market price dynamics Examine the influence of institutional adoption on the general acceptance and traffic of Bitcoin network Identify potential risks and challenges from increased institutional involvement with Bitcoin in the future Created under the pseudonym Satoshi Nakamoto Bitcoin a decentralized digital currency has gained considerable attention and recognition since its inception in 2009 Bitcoin protocol creates a secure and transparent method of conducting financial transactions without intermediaries utilizing the underlying technology of blockchain The transactions in this case are data Bitcoin has transformed from a niche concept of financial inclusion worldwide to a universally acknowledged asset garnering attention from investors regulators and academics alike who seek to understand its potential influence on tomorrow s financial landscape In the early days people wondered whether Bitcoin could survive as the idea of decentralized money operates against the predominantly centralized existing monetary system Many countries have warned their citizens regarding the potential threats associated with Bitcoin citing it being used for criminal purposes and the currency s extreme volatility Several nations such as China have banned using and creating Bitcoin Despite the difficulties it has faced Bitcoin has kept going The initial concept has given rise to a novel crypto industry that now boasts an estimated value of over one trillion dollars Given its market capitalization Bitcoin has become one of the most valuable assets globally No longer do people discuss whether Bitcoin will still exist tomorrow Today legislators are discussing regulating the cryptocurrency industry to maximize returns
