Community, Culture, and Economic Development, Second Edition Meredith Ramsay, 2013-12-01 Newly updated comparative study of economic development policy and its relationship with local power structures and cultural and social relations in two Maryland towns Community economic development is conventionally explained using one of two models a market model that assumes individuals always attempt to maximize their wealth or a growth model that assumes land use is controlled by real estate developers who invariably pursue outside investment as a way of increasing land values and creating jobs and opportunities In the first edition of *Community Culture and Economic Development* Meredith Ramsay's close study of two small towns on Maryland's Lower Shore demonstrated that neither model can explain why these communities alike in so many ways responded so differently to economic decline or why archaic hierarchies of race class and gender remain deeply embedded and poverty seems nearly intractable Ramsay showed how the lack of economic progress in Somerset Maryland's poorest county can best be explained by factoring history culture and social relations into the investigator's research In this second edition she discusses changes that have taken place in the county since the early 1990s including the dramatic legal victory of the Somerset Six and the Maryland ACLU which ultimately paved the way for the election of an African American to a top county position for the first time in history Praise for the First Edition This is a fascinating and sophisticated account of rural politics that is much more than anecdotal The book is unique in applying theories developed in the study of urban policy market growth machine regime to the politics of rural places The analysis rings true it is both theoretically interesting and factually revealing It may be the best account of small town politics since the classic *Small Town in Mass Society* Alvin D Sokolow University of California Davis On rare occasions a book has such depth of insight and freshness of presentation that it breaks down conventional distinctions among facts values and theory

Meredith Ramsay's account of two rural communities is such a study. It incorporates all three in a seamless account. This is a book about everyday people engaged in real struggles and it never loses sight of the context in which they operate. Ramsay makes social and historical embeddedness come alive and inform in a way that few authors can. Clarence Stone, University of Maryland. Gender and Power in Early Childhood Education in Indonesia Vina Adriany, 2024-08-01. Adriany explores gender discourses in early childhood education in Indonesia as well as how teachers and children are engaged in the process of constructing, negotiating, and resisting dominant gender discourses in kindergartens. Using an ethnographic approach, Adriany explores how both the teachers and children are doing and undoing their gender. She adopts feminist, poststructuralist, and postcolonial theories through her research and in that context views gender as something fluid and unfixed. The book also investigates the methodological aspect where the authors have both an inside and outside perspective. Each chapter aims to present and complicate the taken-for-granted practices in kindergartens that relate to how gender and power are constructed. The findings of this book show the extent to which early childhood education becomes a space for the teachers and children to construct, negotiate, as well as resist dominant gender discourses in kindergartens. Offering insights into local and global contexts that shape gender values in early years, this book will be a valuable reference for researchers, scholars, and students in early childhood education, gender studies, and comparative education.
