Understanding Suicide and Its Prevention Federico Sanchez,2010-06-15 Finally a book that explains suicide using the latest research in suicidology A must read for mental health professionals and the survivors of suicide who want to understand why suicide happens The material in this book should be incorporated into the curriculum of psychology and psychiatry because suicide is such a vital topic that is hardly covered in medical schools due to the lack of a coherent theory of the brain in general and suicide in particular This is an important book for all professionals who deal with mental disorders in general and suicide in particular It is the author s fifth book where suicide is explained not as a mysterious process but as a natural consequence of the reactions of the brain under certain conditions when suffering mental disorders The author begins with a brief summary of the statistics of the whos the hows and the wheres of suicide This gives us a clear idea of the magnitude of the problem of suicide of the cost not only in lives but of the emotional toll of the survivors as well as the financial burdens on society as a whole Then as an important first step to understanding the medical community s standard approaches to mental disease he reviews briefly the current psychiatric terminology and the diagnostic tools concerning mental disorders He presents the most accepted current theories and models of suicide He explains what a psychiatric emergency is and what to expect if one ever encounters such a situation And he explains how suicide risk assessment is currently done along with other important considerations He proceeds to explain in everyday language where possible his theory of how the brain works beginning with a simple explanation of how neurons communicate with each other Later he explains how the brain controls the body and how we see with the back of our heads how memory systems become a logical extension or expansion of our sensory and motor systems Awareness and attention are introduced first as an evolutionary tool that aids the senses gather more information from the environment and ultimately as tools that aid in thinking reasoning and constructing our past our lives and our identities But all this would mean nothing without the introduction of emotions and how the brain constructs contexts He explains how emotions are an integral part of memories and how these are related to contexts how basically the brain has created a very concise and compact filing memory system A clear explanation of how emotions are triggered regulated and dissipated is next These lead to a learned discussion of how these various systems can go haywire causing mental disorders A brief but perhaps new and revolutionary approach to these mental disorders is presented next including Obsessive Compulsive

Disorder Delirium Dementia and Other Amnestic Disorders Manic Depression and Depression and Schizophrenia Ultimately it becomes clear how under certain conditions these disorders can lead to suicide The difference between attempters and completers is also explained He then presents a suicide autopsy as an exercise to show how varied the opinions of experts in the field of suicidology are and compares it to his own theories and lets the reader decide for himself who is closer to the truth The fallacy of many expert opinions of where research needs to go is presented The book gives a few words of advice on various therapies and the rationality of their approaches and cautions against their limitations The book devotes a chapter to suicide prevention in the military and how these efforts are bound to fail and another chapter on suicide prevention The author makes important suggestions of how to prevent suicide and lessen suicide rates particularly among the young And lastly a chapter is devoted to the specifics of grief for suicide survivors **Veterinary News** ,2005 **How Sadness Survived** Paul Keedwell,2008 Drawing on evolutionary psychology to argue that depression has a useful function this book offers insight into the true nature of depression its causes consequences and possible benefits It is fully referenced with definitions for technical terms and tables illustrations and diagrams to aid comprehension *Between Survival and Suicide* Benjamin B. Wolman,1976 **The Oxford Handbook of Suicide and Self-Injury** Matthew K. Nock,2014-05-08 Suicide is a perplexing human behavior that remains among the leading causes of death worldwide responsible for more deaths each year than all wars genocide and homicide combined Although suicide and other forms of self injury have baffled scholars and clinicians for thousands of years the past few decades have brought significant leaps in our understanding of these behaviors This volume provides a comprehensive summary of the most important and exciting advances in our understanding of suicide and self injury and our ability to predict and prevent it Comprised of a formidable who s who in the field the handbook covers the full spectrum of topics in suicide and self injury across the lifespan including the classification of different self injurious behaviors epidemiology assessment techniques and intervention Chapters probe relevant issues in our society surrounding suicide including assisted suicide and euthanasia suicide terrorism overlap between suicidal behavior and interpersonal violence ethical considerations for suicide researchers and current knowledge on survivors of suicide The most comprehensive handbook on suicide and self injury to date this volume is a must read text for graduate students fellows academic and research psychologists and other researchers working in the brain and behavioral sciences [Psychobiology of Suicidal Behavior](#) Joseph John Mann,Michael Stanley,1986 **How You Can Survive when They're Depressed** Anne Sheffield,1998 Each year more than 17 million Americans suffer from a depressive illness yet few suffer in solitude How You Can Survive When They re Depressed explores depression from the perspective of those who are closest to the sufferers of this prevalent disorder spouses parents children and lovers and gives the successful coping strategies of many people who live with a clinical depressive or manic depressive and often suffer in silence believing their own problems have no claim to attention Depression fallout is the emotional toll on the depressive s family and close friends who are unaware of their own

stressful reactions and needs Sheffield outlines the five stages of depression fallout confusion self doubt demoralization anger and finally the desire to escape Many people will find relief in the knowledge that their self blame guilt sadness and resentment are a natural result of living with a depressed person Sheffield brings together many real life examples from the pioneering support group she attends at Beth Israel Medical Center of how people with depression fallout have learned to cope From setting boundaries to maintaining an outside social life she gives practical tactics for handling the challenges and emotional stresses on a day to day basis Surviving Literary Suicide Jeffrey Berman,1999 An examination of the effect of suicidal literature on readers novels and poems that depict and sometimes glorify the act of suicide In particular it explores the work of Sylvia Plath Virginia Woolf Ernest Hemingway Anne Sexton Kate Chopin and William Styron **Nursing Care of Survivors of Family Violence** Jacquelyn Campbell,1993 This comprehensive text effectively responds to the growing need for treatment of survivors of family violence Offering a holistic approach to identification assessment intervention and prevention of domestic abuse this book is designed to assist the healthcare professional to care for the victim as well as the family as a unit By integrating theory and application NURSING CARE OF SURVIVORS OF FAMILY VIOLENCE provides a timely practical resource for students and practicing nurses *Suicide, Individual, and Society* Toyomasa Fuse,1997

Principles and Practice of Psychiatric Nursing Gail Wiscarz Stuart,Michele T. Laraia,2001 PRINCIPLES AND PRACTICE OF PSYCHIATRIC NURSING has long been one of the leading psychiatric nursing texts for undergraduate students This popularity is due to its comprehensive coverage of important nursing and medical concepts the widely used stress adaptation framework and a biopsychosocial approach that stresses the mental health continuum and strong current coverage of psychobiology and psychopharmacology reflecting the contemporary biological emphasis in psychiatry The seventh edition offers a new dynamic four color text The basic structure and award winning approach of the book will be retained in the revision accentuated by a new theoretic emphasis on evidence based practice which strives to decrease the knowledge gap between clinical research and everyday practice Integrating this cutting edge information will make Stuart Laraia s approach unique in the psychiatric nursing market Includes a FREE MERLIN website at www.harcourthealth.com MERLIN Stuart
