

Blockchain Technology Explained

A blockchain is an online database, popularly used for cryptocurrency transactions, that stores information chronologically and in blocks.

1

Information is recorded in a block.

2

Once the block is full, it's chained to the rest of the blocks in the database.

3

An empty block is added to the end of the chain to record new information.

Digital Finance and Regulatory Competition Lucien van Romburg, 2024-11-21 International Banking and Finance Law Series 39 Digital Finance and Regulatory Competition Regulating Distributed Ledger Technology Based Financial Products and Services Lucien J van Romburg Governments like people compete against each other but do so in a bid to achieve their myriad socio economic and political aims In the operation of regulatory competition governments may create rules with the intent of attracting capital and labour to their domains In the twenty first century regulatory competition takes on a new dimension in the face of the rapid advancement of digital finance The role of financial technology fintech as a tool through which governments achieve their aims cannot be overstated The proliferation of distributed ledger technologies DLT marked a watershed moment for technological advancement and presented a ripe opportunity for governments to defend their competing claims for resources In this context this book tackles the question of whether the world s leading financial centres Hong Kong London and New York engaged in regulatory competition against each other through their creation of rules to govern DLT based financial products and services during the period 2008 until 2022 In answering this question this book provides a cohesive framework for understanding the influence of regulatory competition on rule creation using a narrative lens based on a comparative study of legal regulatory and policy instruments The lessons distilled from the analysis provide reasoned observations on the potential implications for the future regulation of financial products and services underlined by novel technologies The topics

covered in this book which concern the timely intersection of regulatory competition and fintech include the emergence and impact of DLT its core features types use cases and applications in the financial services industry origins of regulatory competition from Charles Tiebout to the regulatory races to the top and bottom formulation of a definitional matrix which provides a cohesive framework for understanding regulatory competition regulatory frameworks for DLT based financial products and services in Hong Kong London and New York and potential impact of regulatory competition on the future regulation of financial products and services underlined by novel technologies This book represents one of the very few studies comprehensively tackling the topic of regulatory competition through the guise of fintech It will deepen the understanding of lawmakers policymakers and regulators concerning the influence and significance of regulatory competition The discussion surrounding the regulation of DLT based financial products and services will also be of interest to practitioners students and general readers alike

Ownership, Financial Accountability and the Law Paul Beckett, 2019-05-08 There is something visceral about ownership This is mine you can't have it This is mine you can share it This is ours Try to find it Contemporary literature and investigative journalism are showing that the scale of the problem of tax evasion money laundering organised crime terrorism bribery corruption and gross human rights abuses is vast Ownership specifically the quest to identify beneficial owners has been chosen by national and international regulators as the touchstone the litmus test in the fight back An owner by definition must possess something for which they are financially accountable But what is meant by ownership This book explains why ownership is pivotal to accountability and what ownership means in common law civil law and Shariah law terms It looks in detail at State regional and international transparency strategies and at an equally powerful global private counter initiative to promote beneficial ownership avoidance through the use of so called orphan structures Where there is no owner there is no accountability The distinction between privacy and legitimate confidentiality on the one hand and concealment on the other is explained with reference to commercial and trade law and practice principles of corporate governance and applicable business human rights This book introduces one further counter initiative the phenomenon of transient ownership made possible through the use of cryptocurrency and the blockchain The study concludes with a blueprint for action with recommendations addressed to states international organisations practitioners and other stakeholders

Personal Encryption Clearly Explained Peter Loshin, 1998 This book is a hands on guide for using cryptography and encryption The author starts by introducing the concepts of modern encryption secret key encryption public key encryption digital signatures and user authentication mechanisms The reader then moves into why encryption is necessary and how new cryptographic technologies are implemented

CryptoPrivacy Clayton C. Pierce, 1994 This manual concerns the design of classic ciphers which can produce cryptograms just as unbreakable by cryptanalysis as cryptograms from the latest computer systems Piracy then depends largely on how well access to the crypto key is controlled Crypto key whether stored digitally in computer memory

with password access or as hard copy in a safe with combination lock access is vulnerable to unintended access by pilfering coercion etc Hence classic ciphers with upgraded crypto key Triadic Polysubstitutions Vigenere Beaufort Variant Squares Slides Disks Small s Disk Double Substitution Exclusive OR Permutations Fractioned Morse Straddling Polybius Hocheck Checkerway TRANSPOSITION CIPHERS DES Faux Pas Linear Permutations Skipping Tramp Railfence Redefence Columnar Double Transposition Swagmen Penney Tramp Dissociative Transposition Advance payment required on all orders
