ripple litecoin monero and more This clear concise and accessible guide from two industry insiders shows you how to navigate this brave new blockchain world and how to invest in these emerging assets to secure your financial future Cryptoassets gives you all the tools you need An actionable framework for investigating and valuing cryptoassets Portfolio management techniques to maximize returns while managing risk Historical context and tips to navigate inevitable bubbles and manias Practical guides to exchanges wallets capital market vehicles and ICOs Predictions on how blockchain technology may disrupt current portfolios In addition to offering smart investment strategies this authoritative resource will help you understand how these assets were created how they work and how they are evolving amid the blockchain revolution The authors define a clear and original cryptoasset taxonomy composed of cryptocurrencies cryptocommodities and cryptotokens with insights into how each subset is blending technology and markets You ll find a variety of methods to invest in these assets whether through global exchanges trading 24 7 or initial cryptoasset offerings ICOs By sequentially building on the concepts of each prior chapter the book will provide you with a full understanding of the cryptoasset economy and the opportunities that await the innovative investor Cryptoassets represent the future of money and markets This book is your guide to that future

Evaluation of Potential Use Cases for Blockchain in the Insurance Industry Ricardo

Escoda,2021-03-09 Master s Thesis from the year 2020 in the subject Economics Finance grade 1 3 International School of Management Campus Munich language English abstract Blockchain is considered to be a breakthrough technology with many strengths and opportunities but also weaknesses and threats for all industries around the globe It has the potential to revolutionize many sectors but it is not a universal remedy and does not replace every single traditional technology Most businesses do feel insecure whether to invest time and money for Research and Development due to the lack of industry standards and regulations with respect to the technology Before being able to guarantee suitability and successful implementation in any business it is essential to study the differences between public private hybrid and consortium Blockchain types In areas of application not strongly relying on Blockchain s distributed systems alternative solutions such as Big Data Analytics Artificial Intelligence and Machine Learning might be more valuable Nonetheless Blockchain promises the unique potential for insurance companies to efficiently serve global markets with areas of application mainly concentrating on parts of the VC where bureaucracy can be reduced by automation For instance the use of Smart Contracts where lots of data are analyzed saved distributed and pro cessed By implementing BC fields where the focus is on customer experience such as Payments Data Security Transparency and Developing New Business and Product Ideas can be improved enormously Use cases and new products supported by Blockchain might include P2P Micro Insurances Ad hoc and Parametric Insurance Models Automized Underwriting Reduction of Fraud and Abuse and Health Insurance Processes Real Time Analytics in the Form of SCs Instant Pay Outs Automized Claims Management and Improved Risk Modelling of Insurance Businesses might be achievable by connecting Blockchain and Big Data Contrary to the expectations of the author most industry experts are

aware of the benefits and opportunities the technology can bring to their companies Still Blockchain is not anchored in their medium to long term visions and strategies Most of the interviewees would rather act as active observers and early followers than taking the lead proactively Reasons for this behavior are the lack of market standards and regulations the absence of solid Blockchain networks and the shortage of use cases but also the lack of know how and data security concerns
