The market is flooded with chaotic information and abstruse jargon deterring novice investors from taking the first step. This book is made just for you, a practical guide to future growth stocks written exclusively for ordinary people free from overly complex terminology. This book will take you on a clear journey starting with identifying golden sectors. Together we will explore highly promising industries for the next decade such as artificial intelligence, green energy, and digital transformation. You will learn to uncover genuine long-term trends from news and daily life rather than fleeting market hype. Next we move into the core of selecting the stars of tomorrow. You will master a simple and effective framework to analyze a company's economic moat, financial health, and growth momentum while avoiding pseudo-growth stocks that appear promising but are inherently fragile. We also provide easy-to-understand valuation tools to help you make investment decisions at a reasonable price instead of blindly chasing highs. This book complements the author's previous works: *Value Investing Simplified* (seeking undervalued and robust companies) and *Dividend Investing Simplified* (building a defensive cash flow network).
