Starting Off Right In Contracts:

Starting Off Right in Contracts Carolyn Nygren,1998 Nygren begins by discussing how studying contracts is different from studying any other course A discussion of mutual assent which includes offer revocation termination and acceptance is followed by a short section on consideration and promissory estoppel Two sections on defenses to contract cover defenses that were available at the time of the making of the contract and those which became available after the time of the contract making The final two chapters introduce the reader to multi issue exam questions The Project Managers Guide to IDIQ Task Order Service Contracts Mark E. Salesky,2016-11-04 Every year the US federal government will spend roughly 100 billion dollars through competitive IDIQ Indefinite Duration Indefinite Quantity contracts When you add in contracts awarded by State governments and commercial organizations using very similar processes you are looking at 700 billion dollars worth of business Getting a slice of that pie depends on how well you manage the contracting project This is because IDIQs are essentially empty contract structures which then require a second round of winning task orders For contracts with the government this two step structure which is specified in law and regulation has specific pitfalls and opportunities which are rarely the subject of contract and project management training Salesky's coaching style talks you through the specific challenges in the startup management and closing of the IDIQ This book gives a pragmatic and best practice description of the entire life cycle of this type of contract offering you the inside advisor you need to help you through the pragmatics issues of clients performers and bosses expectations **Starting and Running a Business All-in-One For Dummies** Colin Barrow,Paul Barrow,Gregory Brooks,Ben Carter,Frank Catalano,Peter Economy,Lita Epstein,Alexander Hiam,Greg Holden,Tony Levene,Bob Nelson,Steven D. comparative foundations After the collapse of the European Commission s plans to codify European contract law it is timely to reflect on what has been achieved over the past three to four decades and for an assessment of the current situation In particular the production of a bewildering number of reference texts has contributed to a complex picture of European contract laws rather than a European contract law The present book adopts a broad perspective and an integrative approach All relevant reference texts from the CISG to the Draft Common European Sales Law are critically examined and compared with each other As far as the *acquis communie* ie the traditional private law as laid down in the national codifications is concerned the Principles of European Contract Law have been chosen as a point of departure The rules contained in that document have however been complemented with some chapters sections and individual provisions drawn from other sources primarily in order to account for the quickly growing *acquis communautaire* in the field of consumer contract law In addition the book ties the discussion concerning the reference texts back to the pertinent historical and comparative background and it thus investigates whether and to what extent these texts can be taken to be genuinely European in nature ie to constitute a manifestation of a common core of European contract law Where this is not the case the question is asked whether and for what reasons they should be seen as points of departure for the further development of European contract law
