### In Pursuit of Excellence

It makes little difference what profession, trade, or business you finally enter, your college education will serve you well. It will help you as much to handle tools and equipment as to render services to your fellow men. A good education is not just a learning experience; it is also the development of the powers of the mind, the formation of character, and instruction in all matters moral.

In the eyes of the world, a college degree has become a prerequisite for high achievement and the passport to success. College attendance is seen as the unique key to personal development, yea, even to self-respect and inner confidence. Unfortunately, this popular view confuses individual success with human dignity and worth, which are qualities of the mind and spirit of every individual. Every human being, regardless of education and success, may have poise and integrity in his or her comportment worthy of respect.

Contrary to popular belief, a college education is not the only passport to success; in a free economy you may rise to fame and fortune through entrepreneurship, which is the creation and operation of business ventures. A school dropout may become the founder of an enterprise, the president of his company, and a captain of industry by

**Doing Economic Research** Thomas Mayer, 1995 Doing Economic Research brings together a series of authoritative and illuminating essays by Thomas Mayer which bridge the gap between

the abstract work of methodology and the practical research problems that concern the professional economist Arguing that methodologists should pay more attention to the day to day problems that face practising economists Professor Mayer illustrates how simple methodological considerations can clarify a series of issues in applied economics In particular he offers a defence of positivism in economics and counters the argument that economics is not an empirical science Specific essays reassess debates about microfoundations and Ricardian equivalence consider whether assumptions should be realistic question whether recent improvements in techniques have helped to resolve the monetarist debate discuss the role of consumer theory and deal with some key issues in econometric practice Doing Economic Research differs from other work on economic methodology by focusing on specific issues of concern to applied economists such as whether the failure of consumer choice theory on experimental tests matters Applied economists and methodologists will welcome the book's direct down to earth manner and the way in which Professor Mayer's ideas are applied to contemporary economic research
