Chapter Five: Major Contemporary Global Issues

5.1. Survey of Major Contemporary Global Issues

- the world today is distinctively different from, say, the world of the 1970s or 1980s – because of the end of the Cold War
- This new period is now well established though it is still often referred to as the post-Cold War period
- The distinctiveness of the post-Cold War period rests upon the predominance of new issues. the agenda of world politics has been transformed
 - No longer is world politics dominated by
 - Issues arising from East–West relations
 - the threat of nuclear war
 - the ideological struggle between liberal democracy and Marxism–Leninism, crisis diplomacy, and so on
 - The international community is now preoccupied with other issues such as
 - the search for a 'New World Order'
 - the impact of terrorism
 - the disparities in wealth between developed and developing countries
 - environmental issues and so on
- What makes an issue a global issue? The answer to this question is found in addressing the following four interlinked questions
 - What is the extent or scope of an issue? Does it affect large parts of the global arena or it is confined and contained to a narrow scope?
 - What is the urgency or intensity of the issue?
 - is a rather subjective question, since it relates to the general question of 'significant to whom?'
 - What is the salience or visibility of a given issue?
 - This question relates to the roles of the media or other actors who confer urgency or intensity
 - What is the centrality or location of an issue?
 - This is partly an objective issue of geography, implying that the closer the issue is to important actors the greater the attention and significance it will acquire

Global Trends in Real Estate Finance Graeme Newell, Karen Sieracki, 2009-10-08 To operate effectively in today s dynamic global real estatemarkets it is essential to understand the complex processes that underpin them This up to date work which brings together contributions from industry and academic experts from around the world is a valuable corollary to effective

investment decision making within the property sector and will be of interest to post graduate property students, researchers and practising real estate investors. Recent years have seen some rapid developments in the global scale and structure of real estate markets. Such transformations have been paralleled by significant changes in the financial structures and processes that serve these markets, including sophisticated new investment and finance structures and products. Examples of these include the real estate investment trusts (REIT) products that have been developed in USA, Europe and Asia, the range of unlisted products emerging in UK and Europe and the innovative financing structures being developed in many countries. *Global Trends in Real Estate Finance* addresses this emerging complexity and sophistication in contemporary real estate markets by discussing the history, merits and implications of a range of products and processes. Also examined are the changes in the practices and environment needed to ensure the success of these property products, including increased disclosure, corporate governance, market transparency and improved skills base. Chapters are written by leading international contributors, both academic and practitioner. The context is explicitly international, with a focus on UK, Europe, Asia, Australia and the USA. The aim is to identify specific market areas to describe the key innovations, rather than simply providing a description of various geographical markets.
