innovative system interfaces highlighting both lifecycle development and human technology interaction especially in virtual
augmented and mixed reality systems It describes advanced methodologies and tools for evaluating and improving interface
usability and discusses new models as well as case studies and good practices The book addresses the human hardware and
software factors in the process of developing interfaces for optimizing total system performance particularly innovative
computing technologies for teams dealing with dynamic environments while minimizing total ownership costs It also
highlights the forces currently shaping the nature of computing and systems including the need for decreasing hardware
costs the importance of portability which translates to the modern tendency toward hardware miniaturization and
technologies for reducing power requirements the necessity of a better assimilation of computation in the environment and
social concerns regarding access to computers and systems for people with special needs The book which is based on the
