## **World Building:**

Reimagining Adult Education as World Building Aliko Nicolaidis, Ahreum Lim, Neal Herr, Trisha Barefield, 2024-03-18

Reimagining Adult Education as World Building offers a new way of thinking about adult education by re-envisioning how adult education works. It explores how the process of world building or the invention of a new world or a set of concepts can be translated into actual and feasible action when turning towards complex real-life problems. Cultivating contexts where adult educators can become change agents who recognize that the individual and community are intricately entangled demands that educators grow new capacities, make new tools, develop thicker networks, and cultivate intentional links amongst each other to foster ecologies of transformation. This book shows how educators can create an ecology or environment for transformative thinking where students can learn to collaborate and use world building tools to create new responses to current issues. It begins by explaining the philosophical underpinnings of world building and the tools that translate pragmatic imagination into scaffolds for individual and collective capacity building. It also illustrates how the worldbuilding protocol makes a difference in adult learning and how this pedagogical tool introduces the ecological approach to adult education. Each chapter explores a practical case study showing how learners have applied worldbuilding tools to complex challenges. Showing how to apply the world building protocol in a classroom setting, this edited collection will be valuable to Adult Education scholars, researchers, practitioners, and learning facilitators.

*Collaborative Worldbuilding for Writers and Gamers* Trent Hergenrader, 2018-10-18. The digital technologies of the 21st century are reshaping how we experience storytelling. More than ever before, storylines from the world's most popular narratives cross from the pages of books to the movie theatre to our television screens and in comic books series. Plots intersect and intertwine, allowing audiences many different entry points to the narratives. In this sometimes bewildering array of stories across media, one thing binds them together: their large-scale fictional world. *Collaborative Worldbuilding for Writers and Gamers* describes how writers can co-create vast worlds for use as common settings for their own stories. Using the worlds of *Star Wars*, *Lord of the Rings*, *A Game of Thrones*, and *Dungeons & Dragons* as models, this book guides readers through a step-by-step process of building sprawling fictional worlds complete with competing social forces that have complex histories and yet are always evolving. It also shows readers how to populate a catalog with hundreds of unique people, places, and things that grow organically from their world, which become a rich repository of story-making potential. The companion website [collaborativeworldbuilding.com](http://collaborativeworldbuilding.com) features links to online resources, past worldbuilding projects, and an innovative card system designed to work with this book.
