## Summers Reason:

**Methodist Worship** R. Matthew Sigler, 2018-07-04 What makes Methodist worship Methodist or Wesleyan How do Methodists evaluate emerging forms of worship in light of their own liturgical heritage This book considers these questions by bringing to light the work and significance of three Methodist liturgists who have until now received precious little scholarly focus Thomas O Summers 1812 1882 Nolan B Harmon 1892 1993 and James F White 1932 2004 Exploring each one s contribution to the Methodist movement it evaluates their continuing legacies as scholars and practitioners of Methodist worship Importantly the work of all these men occurred during times of cultural change which gave rise to new ways of worship within the landscape of American Methodism Addressing them in chronological order this study shows how each figure enacted liturgical reform and renewal by drawing from the liturgical textual tradition inherited directly from John Wesley s Sunday Service of the Methodist in North America as well as the hymnody of Charles Wesley It also demonstrates how they sought to inculturate the Wesleyan liturgical tradition in the midst of these significant changes Evaluating historic and emerging trends in Methodist liturgical praxis this is a book that will be of great interest to scholars of Methodism the History of Religion Liturgical Studies and Theology *Decisions and Orders of the National Labor Relations Board* United States. paper from the year 2013 in the subject Geography Earth Science Meteorology Aeronomy Climatology grade 85% Ruhr  
University of Bochum language English abstract The Mediterranean Sea is an almost enclosed basin with a coverage of 4000  
km in west east and 1200 km in north south direction Many European North African and Middle Eastern states abut on this  
ocean and are massively influenced by it The Mediterranean can be denoted as a cutting point between subtropical and  
humid climate and is influenced by both of them This and the Mediterranean Sea lead to a very specific and individual  
climate around this basin In this paper the leading factors of the climate conditions are revealed which include references to  
global atmospheric circulations regional climate patterns and micro scale descriptions of specific phenomena in the  
Mediterranean Therefore I refer to different scientific articles and mainly to two specific Mediterranean monographs  
Branigan Bolle Because of the introducing character of this paper most phenomena are explained in a more general way and  
do not have reference to direct climate data More detailed knowledge and data basis can be taken by the references and  
footnotes
