

# SOAP NOTES

**S**

**Subjective:** This section should reflect the information received from the client. Client feedback typically consists of things like their problem, how they're currently feeling, the symptoms they might be experiencing, medical or family history, and so on. It may be helpful to record direct quotes from the client here.

**O**

**Objective:** This section records factual information such as a client's appearance, observable symptoms, test results, and diagnosis. It could also include a review of inputs from other health professionals.

**A**

**Assessment:** Here, record your observations and interpretation of the behaviours and the feedback of the client. In other words, you should account for subjective as well as objective information to provide an overview of a client's condition and progress.

**P**

**Plan:** Based on the assessment, this is where you lay out the next steps for client treatment. When a client has more than one condition, it's best to detail an action plan for each condition.
