## Would Be Writer:

**Critical Reading and Writing** Andrew Goatly, Preet Hiradhar, 2013-09-27 *Critical Reading and Writing* is a fully introductory interactive textbook that explores the power relations at work in and behind the texts we encounter in our everyday lives. Using examples from numerous genres such as popular fiction, advertisements, and newspapers, this textbook examines the language choices a writer must make in structuring texts, representing the world, and positioning the reader. Assuming no prior knowledge of linguistics, *Critical Reading and Writing* offers guidance on how to read texts critically and how to develop effective writing skills. Features include activities in analysis, writing, and rewriting; an appendix of comments on activities; further reading sections at the end of each unit; a glossary of linguistics terms; suggestions for five extended writing projects. Written by an experienced teacher, *Critical Reading and Writing* has multidisciplinary appeal but will be particularly relevant for use on introductory English and Communications courses.

**Becoming a Writing Researcher** Ann M. Blakeslee, Ann Blakeslee, Cathy Fleischer, 2009-03-04 *Becoming a Writing Researcher* effectively guides students through the stages of conducting qualitative writing research, from the initial step of seeing themselves as researchers to identifying research questions, selecting appropriate tools, conducting the research, and interpreting and reporting the findings. Authors Ann M. Blakeslee and Cathy Fleischer describe various qualitative methods and provide readers with examples of real-world applications. Exercises and activities, as well as anecdotes from both novice and seasoned researchers, serve to acquaint readers thoroughly with the practice of carrying out research for scholarly or professional purposes. The textbook introduces students to research methods in a gradual and contextualized manner. Each chapter opens with a discussion of general issues regarding a particular portion of the research process, followed by a consideration of the various physical, conceptual, and strategic tools that allow a beginning researcher to conduct that part of the process. Sections within each chapter also cover personal and theoretical perspectives and biases that influence specific stages of the research process; ethical issues associated with phases of the research process; the identity, ethos, and experiences of the researcher. *Becoming a Writing Researcher* is an essential text for all novice researchers and is well suited for use in graduate-level research methods courses in composition and technical communication. It is also ideal for use in other disciplines with strong qualitative methodology research programs, including education.
