A Shrinking Disease Due to Chronic Sexual Starvation What is Cancer Traditionally medical science has thought of it as an invasive tumor arising spontaneously in an otherwise healthy organism In contrast Wilhelm Reich defines cancer not as a tumor the tumor is merely a late manifestation of the disease but a systemic disease due to chronic thwarting of natural sexual functioning In this radically different scientific investigation of a process that ends literally in the putrefaction of the living body due to chronic suffocation of the tissues Reich has arrived at the conclusion that cancer is the most significant somatic expression of biophysiological effect of sexual stasis If this is so there is a far greater possibility for prevention of cancer than for its treatment The Cancer Biopathy is Volume II of The Discovery of the Orgone Volume I is The Function of the Orgasm **The Discovery of the Orgone: The cancer biopathy** Wilhelm Reich, 1973 **The Discovery of the Orgone: The cancer biopathy** Wilhelm Reich, 1948 **The Psychotherapeutic Treatment of Cancer Patients** Jane G.
