

Cities in Transition: The Moving Image and the Modern Metropolis

copy link in description

The city is one of the greatest unsung heroes in cinema – a modernist inspiration for silent classics such as *Metropolis* (1926) and a dense urban jungle in *The Matrix* (1999) – yet there have been few attempts to grasp the cultural and aesthetic nature of its role in film. This volume is an ambitious collection of writings and photo-essays discussing this complex yet enduring relationship, and how early cinema, digital technology and changing urban geographies have all impacted upon notions and representations of the modern city. Amongst the films discussed are *Peeping Tom* (1960), *Performance* (1970), *Sans Soleil* (1983) and *Amores perros* (2000). Contributions come

Chaos: Topics In Modern Statistical Physics G Gyorgyi,I Kondor,L Sasvari,Tamas Tel,1992-04-29 This volume comprises about forty research papers and essays covering a wide range of subjects in the forefront of contemporary statistical physics The contributors are renown scientists and leading authorities in several different fields This book is dedicated to P ter Sz pfalusy on the occasion of his sixtieth birthday Emphasis is placed on his two main areas of research namely phase transitions and chaotic dynamical systems as they share common aspects like the applicability of the probabilistic approach or scaling behaviour and universality Several papers deal with equilibrium phase transitions critical dynamics and pattern formation Also represented are disordered systems random field systems growth processes and neural network Statistical properties of interacting electron gases such as the Kondo lattice the Wigner crystal and the Hubbard model are treated In the field of chaos Hamiltonian transport and resonances strange attractors multifractal characteristics of chaos and the effect of weak perturbations are discussed A separate section is devoted to selected mathematical aspects of dynamical systems like the foundation of statistical mechanics including the problem of ergodicity and rigorous results on quantum chaos

Bayesian Statistics and Marketing Peter E. Rossi,Greg M. Allenby,Rob McCulloch,2012-05-14 The past decade has seen a dramatic increase in the use of Bayesian methods in marketing due in part to computational and modelling breakthroughs making its implementation ideal for many marketing problems Bayesian analyses can now be conducted over a wide range of marketing problems from new product introduction to pricing and with a wide variety of different data sources Bayesian Statistics and Marketing describes the basic advantages of the Bayesian approach detailing the nature of the computational revolution Examples contained include household and consumer panel data on product purchases and survey data demand

models based on micro economic theory and random effect models used to pool data among respondents The book also discusses the theory and practical use of MCMC methods Written by the leading experts in the field this unique book Presents a unified treatment of Bayesian methods in marketing with common notation and algorithms for estimating the models Provides a self contained introduction to Bayesian methods Includes case studies drawn from the authors recent research to illustrate how Bayesian methods can be extended to apply to many important marketing problems Is accompanied by an R package bayesm which implements all of the models and methods in the book and includes many datasets In addition the book s website hosts datasets and R code for the case studies Bayesian Statistics and Marketing provides a platform for researchers in marketing to analyse their data with state of the art methods and develop new models of consumer behaviour It provides a unified reference for cutting edge marketing researchers as well as an invaluable guide to this growing area for both graduate students and professors alike [Patrick Suppes: Scientific Philosopher](#) P.

Humphreys,1994-09-30 Patrick Suppes is a philosopher and scientist whose contributions range over probability and statistics mathematical and experimental psychology the foundations of physics education theory the philosophy of language measurement theory and the philosophy of science He has also been a pioneer in the area of computer assisted instruction In each of these areas Suppes has provided seminal ideas that in some cases led to shaping the direction of research in the field The papers contained in this collection were commissioned with the mandate of advancing research in their respective fields rather than retrospectively surveying the contributions that Suppes himself has made The authors form an interesting mixture of researchers in both formal philosophy of science and science itself all of whom have been inspired by his ideas To maintain the spirit of constructive dialogue that characterizes Suppes s intellectual style he has written individual responses to each article In Volume 1 Probability and Probabilistic Causality nineteen distinguished philosophers and scientists focus their attention on probabilistic issues In Part I the contributors explore axiomatic representations of probability theory including qualitative and interval valued probabilities as well as traditional point valued probabilities Belief structures and the dynamics of belief are also treated in detail In Part II the rapidly growing field of probabilistic causation is assessed from both formal and empirical viewpoints For probability theorists statisticians economists philosophers of science psychologists and those interested in the foundations of mathematical social science In Volume 2 Philosophy of Physics Theory Structure and Measurement Theory fifteen distinguished philosophers and scientists cover a wide variety of topics Part III covers issues in quantum theory geometry classical mechanics and computational physics Part IV explores Suppes s well known set theoretic account of scientific theories which has served him well throughout his career Suppes s contributions to measurement theory have been widely used in mathematical psychology and elsewhere and this material is the subject of Part V For physicists logicians workers in mathematical social science and philosophers of science In Volume 3 Philosophy of Language and Logic Learning and Action Theory fourteen distinguished philosophers and scientists explore issues in the

philosophy of language logic and philosophical psychology Suppes's suggestions that quantum theory requires a rethinking of classical logic form a particularly sharp account of that controversial thesis and Part VI deals with this issue together with topics in the philosophy of language and logic including relational grammars and anaphora Part VII deals with issues in psychology action theory and robotics while Part VIII concludes with a general survey of Suppes's views in the philosophy of science A comprehensive chronological and topical bibliography of Suppes's writings is included in this volume For philosophers of language theoretical linguists logicians workers in mathematical social sciences and philosophers of science

An Estimated New Keynesian Dynamic Stochastic General Equilibrium Model of the Euro Area Marco Ratto, 2005 This paper applies Bayesian estimation techniques to a time series data set of the euro area and presents estimates of a DSGE model

The purpose of this paper is not to estimate the current version of the QUEST model directly with these methods but rather to estimate a prototype new generation New Keynesian DSGE model This model can then serve as a benchmark for an estimation of a QUEST specification In fact in some dimensions the QUEST model may need to be adjusted to come closer to a DSGE model *A Study of Metal-insulator Transitions in the Binary Alloy and Ionic Hubbard Models* Norman Paris,2007
