## **Uncertain Decisions Bridging Theory And Experiments:**

**Uncertain Decisions** Luigi Luini,2012-12-06 Uncertain Decisions Bridging Theory and Experiments presents advanced directions of thinking on decision theory in particular the more recent contributions on non expected utility theory fuzzy decision theory and case based theory This work also provides theoretical insights on measures of risk aversion and on new problems for general equilibrium analysis It analyzes how the thinking that underlies the theories described above spills over into real decisions and how the thinking that underlies these real decisions can explain the discrepancies between theoretical approaches and actual behavior This work elaborates on how the most recent laboratory experiments have become an important source both for evaluating the leading theory of choice and decision and for contributing to the formation of new models regarding the subject

**Cognitive Processes and Economic Behaviour** Marcello Basili,Nicola Dimitri,ITZHAK GILBOA,2012-12-06 In recent years the understanding of the cognitive foundations of economic behavior has become increasingly important This volume contains contributions from such leading scholars as Adam Brandenburger Michael Bacharach and Patrick Suppes It will be of great interest to academics and researchers involved in the field of economics and psychology as well as those interested in political economy more generally

**Environment, Inequality and Collective Action** Marcello Basili,Maurizio Franzini,Alessandro Vercelli,2005-12-21 Efficiency is the hallmark of environmental economics and though economists are concerned with the environment primarily because it challenges the efficiency of competitive markets until now limited attention has been paid to distributional issues This excellent collection of essays identifies and addresses key issues surrounding the inequality environment relationship such as Does increasing economic inequality lead to better or worse environmental quality Which individual or social features play a role in determining the differentiated impact of changes in the environment What impact does economic inequality or social segmentation have on collective action How important is the complex economic and social institution in which the inequality environment takes place With an impressive array of contributors and an excellent mix of popular and noteworthy topics this latest addition to the Routledge Siena Studies in Political Economy series will prove essential to economists with an interest in the environment and will be useful to readers with a more general environmental studies background
