The Microflora of the Rumen P. N. Hobson, 1976      *Rumen Microbiology* Burk A. Dehority, 2023-07-24 Original edition reissued in 2023 with new cover This is a print on demand title and is not held in stock The delivery leadtimes will be longer This book offers an introduction to the microbes and microbial activity of the rumen It offers an in depth description of rumen bacteria protozoa and fungi Information is given on microbial concentrations and those factors which control or influence their numbers in the rumen Both the synergism and negative effects resulting from microbial interactions are discussed The ability of herbivores especially ruminants to convert energy from cellulose an energy source not usable by man to meat milk and other products is both of interest and economic importance An understanding of the activity in the rumen should aid nutritionists in developing adequate feedstuffs for a variety of ruminant animals The book also covers information on gastrointestinal fermentation by wild ruminants and non ruminant herbivores      **The Rumen and Its Microbes** Robert E. Hungate, 2013-10-22 *The Rumen and Its Microbes* is a contribution to the ecology of this important microbial habitat Relatively few microbial habitats have been subjected to a thorough quantitative ecological analysis The rumen fermentation is peculiarly suitable because of its relatively constant and continuous nature and because of the very rapid rates of conversion of organic matter Although analysis of the ruminant microbe symbiosis is still far from complete knowledge is sufficient for formulation of principles and for identification and measurement of important parameters The first eight chapters of the book include a description of the rumen and its microbes their activities and the extent of these activities This basic biology provides a framework in which applications to agriculture can be evaluated These applications are discussed in the last four chapters host metabolism variation in the rumen possible practical applications and abnormalities in rumen function      Some Studies on the Microflora of the Rumen David W. F. Wheater, 1954      *Rumen Microbiology: From Evolution to Revolution* Anil Kumar Puniya, Rameshwar Singh, Devki Nandan Kamra, 2015-07-11 This book offers an in depth description of different groups of microbes i e bacteria protozoa fungi and viruses that exist in the rumen microbial community and offers an overview of rumen microbiology the rumen microbial ecosystem of domesticated ruminants and rumen microbial diversity It provides the latest concepts on rumen microbiology for scholars researchers and teachers of animal and veterinary sciences With this goal in mind throughout the text we focus on specific areas related to the biology and complex interactions of the microbes in rumen integrating significant key issues in each respective area We also discuss rumen manipulation with plant secondary metabolites microbial feed additives utilization of organic acids selective inhibition of harmful rumen microbes and omics approaches to manipulating rumen microbial functions A section on the exploration and exploitation of rumen microbes addresses topics including the current state of knowledge on rumen metagenomics rumen an underutilized niche for industrially important enzymes and ruminal fermentations to produce fuels We next turn our attention to commercial applications of rumen microbial enzymes and to the molecular characterization of euryarchaeal

communities within an anaerobic digester A section on intestinal disorders and rumen microbes covers acidosis in cattle urea ammonia metabolism in the rumen and nitrate nitrite toxicity in ruminant diets Last the future prospects of rumen microbiology are examined based on the latest developments in this area In summary the book offers a highly systematic collection of essential content on rumen microbiology

Historical Background lowe my interest in the lactic acid bacteria LAB to the late Dr Cyril Rainbow who introduced me to their fascinating world when he offered me a place with him to work for a PhD on the carbohydrate metabolism of some lactic rods isolated from English beer breweries by himself and others notably Dr Dora Kulka He was particularly interested in their preference for maltose over glucose as a source of carbohydrate for growth expressed in most cases as a more rapid growth on the disaccharide but one isolate would grow only on maltose Eventually we showed that maltose was being utilised by direct fermentation as the older texts called it specifically by the phosphorylysis which had first been demonstrated for maltose by Doudoroff and his associates in their work on maltose metabolism by a strain of Neisseria meningitidis I began work on food fermentations when I came to Strathclyde University and I soon found myself involved again with the bacteria which I had not touched since completing my doctoral thesis In 1973 IG Carr C V Cutting and G c Whiting organised the 4th Long Ashton Symposium Lactic Acid Bacteria in Beverages and Food and from my participation in that excellent conference arose a friendship with Geoff Carr The growing importance of these bacteria was subsequently confirmed by the holding a decade later of the first of the Wageningen Conferences on the LAB
