Uncommon Knowledge:

Uncommon Knowledge Al McDowell, 2009 This book develops new science of gravity and light based on the century old Le Sage theory of an ether that was replaced by Einstein's Theory of Relativity After presenting astrophysical data contradicting the theory that the universe is expanding from a Big Bang experiments believed to prove Relativity are shown to actually prove the ether theory instead Freedom from the speed limit of light enables a science of subatomic particles traveling faster than light to produce gravity electric and magnetic fields light and radio waves Major technical innovations include solving the two fundamental problems with the Le Sage gravity theory and extending this theory to electromagnetism and consciousness This is a theory of everything that explains the heretofore unknown causes of the forces of nature This book builds on the works of Zecharia Sitchin and other authors to explain how life developed on Earth and that evolution requires direction from intelligence that dwells in the subatomic particles on which this theory of gravity and light is based Our biblical God is shown to be a composite of Sitchin's extraterrestrial gods who colonized Earth and the intelligence that dwells alongside our own mind in the particles from which the universe is constructed and powered Managing Innovation

John C. Huber, 2001 This book is filled with practical advice for inventors and managers It charts the course from ideas and needs through selecting the best projects and turning them into successes Also the exclusive Inventor Profile is a powerful tool for identifying people with the most inventive potential It comes from the most productive inventors in the U S There are 45 figures and tables all backed up with new methods of research and analysis Yet the style is direct and highly readable

Groundless Paths Karl Brunnholz, 2012-08-14 The Abhisamayalamkara summarizes all the topics in the vast body of the prajaparamita sutras Resembling a zip file it comes to life only through its Indian and Tibetan commentaries Together these texts not only discuss the hidden meaning of the prajaparamita sutras the paths and bhumis of sravakas pratyekabuddhas and bodhisattvas but also serve as contemplative manuals for the explicit topic of these sutras emptiness and how it is to be understood on the progressive levels of realization of bodhisattvas Thus these texts describe what happens in the mind of a bodhisattva who meditates on emptiness making it a living experience from the beginner's stage up through buddhahood Groundless Paths contains the first in depth study of the Abhisamayalamkara the text studied most extensively in higher Tibetan Buddhist education and its commentaries from the perspective of the Nyingma School of Tibetan Buddhism This study consists mainly of translations of Maitreya's famous text and two commentaries on it by Patrul Rinpoche These are supplemented by three short texts on the paths and bhumis by the same author as well as extensive excerpts from commentaries by six other Nyingma masters including Mipham Rinpoche Thus this book helps close a long standing gap in the modern scholarship on the prajaparamita sutras and the literature on paths and bhumis in mahayana Buddhism Arya Maitreya's Ornament of Clear Realization with its Indian and Tibetan commentaries presents the complex dynamics of the path to liberation as a succession of realizations of the empty nature of all phenomena This presentation is a powerful

antidote to whatever two dimensional views we might hold about spiritual experience and the journey to enlightenment
