The Social Construction of Ancient Cities Monica L. Smith,2013-04-09 What made ancient cities successful What are the similarities between modern cities and ancient ones The Social Construction of Ancient Cities offers a fresh perspective on ancient cities and the social networks and relations that built and sustained them marking a dramatic change in the way archaeologists approach them Examining ancient cities from a bottom up perspective the authors in this volume explore the ways in which cities were actually created by ordinary inhabitants They track the development of urban space from the point of view of individuals and households providing new insights into cities roles as social centers as well as focal points of political and economic activities Analyzing various urban communities from residences and neighborhoods to marketplaces and ceremonial plazas the authors examine urban centers in Africa Mesoamerica South America Mesopotamia the Indian subcontinent and China Collectively they demonstrate how complex networks of social relations and structures gave rise to the formation of ancient cities contributed to their cohesion and sustained their growth much as they do in modern urban centers The authors analyses draw from ancient texts as well as

archaeological surveys and excavations of urban architecture and other material remains including portable objects for daily use and comestibles They show clearly how early urban dwellers consciously developed dense interdependent social networks to satisfy their needs for food housing and employment forged their own urban identities and generally managed to thrive in the crowded bustling and competitive environment that characterized ancient cities Not least of all they suggest how urban leaders and urban dwellers negotiated a consensus that enabled them to achieve both mundane and extraordinary goals in the process establishing their unique ritual legal and social status

Report on the Social Statistics of Cities United States. Census Office,1887 Social Science and Urban Crisis Herbert S. Graves,1971 *Cities and Buildings* Larry Ford,1994-04 In this text Ford offers an account of the relationship between urban architecture especially vernacular architecture and the spatial arrangement and development of cities in North America From office towers in the central business district to commercial strips in the edge city Ford shows how changes in the built environment parallel changes in urban economies and human culture Focusing on ordinary structures rather than famous landmarks the book aims to provide a guide to understanding the changing character of any urban landscape

Sustainability and Cities Peter Newman,Jeffrey Kenworthy,1999-02 Our dependence on cars is a huge problem but the authors argue that it can be overcome and a new form of urban organisation developed They examine the trends which shape global cities and establishes transport priorities within this framework Census Reports Tenth Census: Report on the social statistics of cities, compiled by United States. Census Office,1887 **Social Areas in Cities** David T. Herbert,1978
