CASE STUDY for POSITIVE CHARGE

PROBLEM

- In urban areas, the lack of efficient and accessible EV charging stations hindered the adoption of electric vehicles, particularly among logistics companies.
- Our research indicated a 30% decrease in operational efficiency due to limited charging infrastructure.

SOLUTION

- Positive Charge introduced an innovative network of high-speed, multi-point EV charging stations.
- These stations are strategically located in key logistics hubs to maximize accessibility and reduce downtime for electric logistics fleets.

APPROACH

- Our approach involved in-depth analysis of logistics routes to identify optimal locations for charging stations. We partnered with local businesses for station placement, ensuring minimal disruption.
- Our team also implemented advanced software for seamless charging schedule management, integrating real-time data to optimize usage.

The revolution in EV logistics is not just about the vehicles but also about the supporting infrastructure.

- Dr. Emily Zhou, Lead Transportation Engineer, EV Innovations Inc.

Positive Charge's network has been a game changer for urban logistics, reducing our fleet's charging time by 40%.
