Redefining Acute Psychiatric Care: Strategies for Improved Inpatient Experiences

Stefano Barlati, Joseph O. Fadare, Alfonso Ceccherini-Nelli, 2026-02-03 This is volume II of our previous collection linked here Evidence best practice suggests minimizing the length of hospital stay for patients with mental disorders by using hospitalization as the starting point of a new individualized therapy project Particularly effective in reducing relapses in severe mental disorders is the use of territorial multidisciplinary teams with the identification of a case manager In severe mental disorders the intensive case management model is effective in reducing hospitalizations and improving the duration of the service relationship In this perspective even if the therapeutic project should be organized outside the hospital there is still a need to improve hospitalization in the acute phase both in terms of appropriateness and in terms of the quality of the care provided The time has come to rethink acute hospitalization services providing new treatment modalities even in the most acute phase of subjective suffering Although the length of hospitalization should be limited it is necessary to transform the hospital into a place where the patient must feel good must receive personalized assistance and must obtain an answer to his/her care needs Fundamental in this new perspective is the reduction of mandatory health treatments the reduction of mechanical and pharmacological restraints Acute hospitalization should be viewed as a phase of the patient's project and not as an intervention isolated from the rest of the care pathway It would be appropriate to start some evidence based psychosocial rehabilitation practices already in the hospitalization phase such as patient and/or family psychoeducation in order to improve the engagement with the service and the global outcome in the medium and long term In the hospitalization phase it should be taken into account some at risk populations adolescents elderly patients subjects with substance use disorder and with medical comorbidities The training of all the staff members on the following issues is also crucial teamwork

methods management and prevention of hetero aggressive and suicidal risk interview techniques and ways to establish a correct therapeutic relationship with the patient The aim of this Research Topic is to evaluate the outcomes of hospitalizations in psychiatric acute wards for the different diagnoses and for the different types of patients In this perspective it would be important to evaluate not only the clinical outcomes in terms of improvement of the psychopathological symptoms that led to hospitalization but also some areas of psychosocial functioning We welcome research articles literature reviews case reports and perspectives covering but not limited to the following themes Personal recovery of inpatients during and after hospitalization Patients legal rights in a psychiatric hospital setting Ethical issues that may arise in the treatment of patients with mental health Psychiatrists role in supporting inpatients lead a fulfilling life Treatments and therapies for inpatients with mental health disorders Investigating the use of acute psychiatric hospitalization

YSEC Yearbook of Socio-Economic Constitutions 2023 Eduardo Gill-Pedro,Andreas Moberg,2024-05-06

Artificial intelligence AI has the potential to radically transform our society It may lead to a massive increase in the capabilities of humankind and allow us to address some of our most intractable challenges It may also entail profound disruption to structures and processes that have sustained our society over centuries These developments present a unique challenge to the socio economic constitutional arrangements which govern our world at national regional and international level The deployment of increasingly powerful AI systems able to function with increasing degree of autonomy has led to concerns over loss of human control of important societal processes over the disruption of existing economic social and legal relationships and over the empowerment of some societal actors at the expense of others together with the entrenchment of situations of domination or discrimination It has also made increasingly clear how tremendous the potential benefits that these technologies may bring are to those who successfully develop and deploy them There is therefore great pressure on governments international institutions public authorities civil society organisations industry bodies and individual firms to introduce or adapt mechanisms and structures that will avoid the potentially negative outcomes of AI and achieve the positive ones These mechanisms and structures which have been given the umbrella term AI governance cover a wide range of approaches from individual firms introducing ethical principles which they volunteer to abide by to the European Union legislating an AI Act which will prohibit certain types of AI applications and impose binding obligations on AI developers and deployers The fast pace of innovation in the development of AI technologies is mirrored by the fast pace of development of the emerging field of AI governance where traditional legislation by public bodies is complemented with more innovative approaches such as hybrid and adaptive governance ethical alignment governance by design and the creation of regulatory sandboxes The chapter AI and Sensitive Personal Data Under the Law Enforcement Directive Between Operational Efficiency and Legal Necessity is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)

Rudolph's Pediatrics, 23rd Edition Mark W. Kline, Susan M. Blaney, Angelo P. Giardino, Jordan S. Orange, Daniel J. Penny, Gordon E. Schutze, Lara S. Shekerdemian, Abraham M. Rudolph, Colin D. Rudolph, 2018-08-21

Publisher's Note: Products purchased from Third Party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitlements included with the product.

The landmark pediatrics reference completely reinvented by an all new team of editors Rudolph's Pediatrics has virtually defined the pediatric field for over a century becoming one of the most important and well respected pediatrics texts ever published. Renowned for its balance of clinical features and treatment of disease with underlying biological principles, this classic sourcebook has helped generations of pediatricians optimize their care of infants, children, and adolescents. The Twenty Third Edition of Rudolph's has been completely restructured and streamlined thanks to an all new team of editors whose goal was to reinvent this classic with today's busy practitioner in mind. Presented in full color, the Twenty Third Edition provides an up to date in depth survey of pediatric medicine unmatched by any other text. With its algorithmic approach to pediatric systems, the book facilitates the diagnosis and treatment of both common and uncommon pediatric illnesses and it reflects new technologies and advances in molecular medicine that continue to evolve with current thinking about normal childhood development and pediatric disease processes. New team of editors achieves consistency in both tone and depth of content. Contributions from section editors and authors from leading academic pediatrics programs give expert coverage of general pediatrics and all of the pediatric sub specialties. Streamlined and consistent format for most chapters outlining Pathogenesis and Epidemiology, Clinical Manifestations, Diagnosis, Treatment, and Prevention. New 2 Volume presentation improves portability. Hundreds of full color illustrations and tables. The acclaimed balance between clinical applicability and underlying biological principles offers pediatricians a depth of coverage not found anywhere else. Brand new or significantly revised chapters include: Complementary and Integrative Pediatrics, Childhood Adversity and Toxic Stress, Autism Spectrum Disorder, Pediatric Depression and Bipolar Spectrum Disorders, Extracorporeal Membrane Oxygenation (ECMO) Palliative Care for Children with Chronic Diseases, Arboviruses with new coverage of Zika virus and chikungunya virus, Physiologic Basis of Pulmonary Function, Acute Lymphoblastic Leukemia, Neuroblastoma. You'd be hard pressed to find a resource that matches up to the comprehensive scope of Rudolph's. It's no wonder it's a staple in most offices and hospitals.
