It also presents strategies, tools, and guidelines that enable informed decisions on planning, designing, budgeting, constructing, maintaining, marketing, and increasing the sustainability of this re-invented cityscape. Case studies demonstrate the environmental, economic, and social value of these landscapes and reveal paths to a greener and healthier urban environment. This unique and indispensable guide details how to plan, design, fund, construct, and leverage the

sustainability aspects of the edible landscape typology Covers over a dozen typologies including community gardens urban farms edible estates green roofs and vertical walls edible school yards seed to table food landscapes within parks plazas streetscapes and green infrastructure systems and more Explains how to design regenerative edible landscapes that benefit both community and ecology and explores the connections between food policy and planning that promote viable food shed systems for more resilient communities Examines the integration of management maintenance and operations issues Reveals how to create a business model enterprise that addresses a lifecycle approach
