L.,Kansra, Pooja,Kukreja, Gagan,2022-06-03 The surge in technological transformation affects all business model phases over many industries Emerging technologies provide new avenues for industries to increase their competitive advantage and enhance economic progression Blockchain technology s ability to build an open and trustworthy network model seems to promote shared IT based networks in banking insurance and other similar industries The adoption of blockchain in the banking and insurance industry is developing rapidly Applications Challenges and Opportunities of Blockchain Technology in Banking and Insurance explores how blockchain technologies optimize and integrate the transactions and operations in association with access to information and reduction in communication costs and negligible data transfer errors It includes studies on various banking and insurance industries intending to use blockchain technology to make transactions convenient simple and safe Covering topics such as cryptocurrency digital transformation and small and

medium sized enterprises this premier reference source is an essential resource for policymakers government officials students and educators of higher education libraries banking managers insurance professionals researchers and academicians

Fintech Explained Ana Maria Minescu, 2018-07-18 We live in times of change Banks continue to be all about money But money is less and less about banks Nowadays people pay send money borrow lend invest and secure financing for projects increasingly without the involvement of banks Understanding the fintech phenomenon is an imperative for us all Fintech Explained covers some of the main themes related to fintech P2P lending alternative payments blockchain cryptocurrencies and wealthtech This book is addressed to a broad audience and consequently is aiming to cover potential concerns from all of them students finance and banking professionals and in general all readers who are passionate about innovation technology and finance and who are keen to stay up to date with the fast paced developments that are occurring around us The book is hopefully answering many questions but it aims to set the ground where additional further questions will be asked By you the readers

AI Nation Rising Michael T. Murphy, 2026-02-26 The definitive technical and strategic reference for AI deployment in defense governance and critical industrial systems At 1 700 pages and over a million words it equips defense contractors policymakers law enforcement and cybersecurity professionals with the systems knowledge and strategic frameworks to deploy AI where the consequences of failure are highest We are living through the most consequential technological transition in modern history Artificial intelligence is no longer confined to research laboratories it is actively reshaping national defense doctrine democratic governance law enforcement and industrial civilization Nations that deploy AI with strategic clarity will define the global order Those that do not will navigate a world shaped by decisions they had no part in making AI Nation Rising is the definitive technical and strategic reference for the practitioners planners and policymakers who bear responsibility for getting this right At 1 700 pages spanning thirty one chapters it is the most comprehensive treatment of mission critical AI deployment ever assembled in a single work written for defense contractors intelligence analysts government policymakers law enforcement investigators cybersecurity professionals and industrial leaders operating at the intersection of technology and consequence The book opens with rigorous grounding in foundational AI systems supervised unsupervised and reinforcement learning paradigms transformer based large language models distributed data infrastructure and privacy preserving techniques including federated learning and differential privacy For a defense contractor assessing platform capabilities a policymaker evaluating vendor claims or a systems integrator designing classified infrastructure this foundation is not academic It is operational Part III the heart of the book provides exhaustive coverage of AI in defense national security forensic science and law enforcement Defense professionals will find authoritative treatment of strategic AI infrastructure cyber defense and information warfare counter disinformation systems and critical infrastructure protection Military intelligence chapters address the full ISR pipeline from satellite imagery automation and SIGINT processing to biometric identification and HUMINT support Tactical applications cover autonomous combat systems

automatic target recognition swarm coordination and battlefield logistics The naval chapters address Aegis combat system integration submarine detection anti ship missile defense and autonomous surface and underwater vehicles Law enforcement professionals will find deep coverage of digital forensics cryptocurrency crime investigation crime scene reconstruction trace evidence analysis and judicial AI including deepfake detection and evidence authentication Parts IV and V extend this rigor across democratic governance biomedical AI earth sciences space exploration manufacturing and financial services from election integrity monitoring and political risk modeling to drug discovery pandemic response precision agriculture geospatial intelligence and regulatory compliance Throughout the book treats deployment challenges integration constraints and failure modes as central subjects not footnotes Each domain includes analysis of near term evolution trajectories reflecting the reality that today's architectural decisions will shape AI capability for a decade The closing section addresses ethics global regulatory frameworks and societal implications with the same analytical seriousness brought to every technical chapter AI Nation Rising is written in full recognition of the stakes The decisions being made today about AI in defense governance and critical infrastructure will shape the security and sovereignty of nations for generations and they deserve to be informed by the best available understanding of what these technologies can do and what it genuinely takes to deploy them where failure is measured not in wasted resources but in lives freedoms and the integrity of civilized society

Disruptive Innovation in Business and Finance in the Digital World J. Jay Choi, Bora Ozkan, 2019-10-21 This volume contains fourteen articles split across four parts exploring the debate around the topics of fintech AI blockchain and cryptocurrency Featuring a cast of global contributors this is an unmissable volume exploring the most current research on digital innovation in the financial and business worlds Let's Meet Blockchain Sylvain Metz, 2023-12-26 A quiet revolution is taking place within the computer ecosystem one that will change the way we do business on the internet It's called blockchain and it promises to disrupt the way people interact with one another online whether its messaging banking keeping up with medical records land records booking a vacation socializing or voting Programs are also being developed to use blockchain to serve as one's identity papers Blockchain technology is based on the idea that all online transactions should be between two people without the need for public or private third party oversight Blockchain technology developers believe thoughts and ideas should be shared not quashed It's a world where web platforms are governed by their members not a board of directors privacy comes first and one's personal information is kept private not for third parties to take and sell as they please Blockchain technology offers everyone opportunities to take part Anyone can participate in the fast growing world using non fungible tokens NFTs where works of art music literature and poetry can be tokenized and sold or traded on a blockchain These components comprise the next generation of the world wide web which is referred to as Web 3.0 Billions of dollars are being spent to create infrastructure to create a viable framework to mainstream blockchain This book offers a peek into this new world with examples of how this technology is being used today as well as the hurdles including

legal challenges it must overcome to be viable So if you re ready let s meet blockchain **Blockchain Technology** Sonali Vyas,Vinod Kumar Shukla,Shaurya Gupta,Ajay Prasad,2022-04-19 This book is for anyone who wants to gain an understanding of Blockchain technology and its potential The book is research oriented and covers different verticals of Blockchain technology It discusses the characteristics and features of Blockchain includes techniques challenges and future trends along with case studies for deeper understanding Blockchain Technology Exploring Opportunities Challenges and Applications covers the core concepts related to Blockchain technology starting from scratch The algorithms concepts and application areas are discussed according to current market trends and industry needs It presents different application areas of industry and academia and discusses the characteristics and features of this technology It also explores the challenges and future trends and provides an understanding of new opportunities This book is for anyone at the beginner to intermediate level that wants to learn about the core concepts related to Blockchain technology **The rise of non-fungible tokens (NFTs) in fashion and luxury** Laura Schneider,2022-11-21 Master s Thesis from the year 2022 in the subject Business economics Miscellaneous grade 7 8 Bocconi University Department of Management and Technology course M Sc International Management language English abstract The concept of the metaverse and non fungible tokens has become ubiquitous and fashion and luxury companies are faced with the need to define a thorough strategy to tackle its business impact Despite some brands acting at the forefront of NFT adoption the utility of the infant technology remains unclear By conducting a 2x2 factorial design experiment this research creates insights into guidelines for NFT strategies for fashion and luxury companies First the high importance of connecting NFT offers with experiences is confirmed Second a coherence of values between NFT technology and the luxury industry was illustrated Finally the experiment suggested a high difference in perceived utility of real world asset NFTs and digital asset NFTs for mainstream brands while the difference could not be proven in the case of luxury companies In conclusion the NFT strategy matrix was developed which introduces four dimensions of brand loyals brand collectors fad enthusiasts and fad curious differentiated by their brand loyalty and desired NFT utility This framework aims to provide a tool for fashion and luxury companies to cater their holistic NFT offering to different customer groups In general it is advisable to move from digital asset NFTs toward real world asset NFTs in order to engage consumers with rare experiences in a virtual or physical setting and deploy the technology as an experiential marketing tool **Blockchain Technology Compliance with the European Union (EU) General Data Protection Regulation (GDPR)** Oliver Zeidler,2020-09-04 Essay from the year 2020 in the subject Computer Sciences Internet of Things IOT grade 1 0 Oxford University Faculty of Law language English abstract In this essay I will argue that the GDPR is slowing down technology progress in the EU with respect to the Blockchain technology The blockchain is of particular interest to me as I detected the potential legal issues and impact of blockchain technology within my professional work I identified several legal ramifications in different fields of law that I believe will raise major problems in the near future

Moreover it is not currently certain how United Kingdom will treat the international law internally after Brexit as Article 3 GDPR is limiting the spatial application area to the European Union and processes taking place in this terrain I will outline these problems here

Neoliberalism and the Rise of Bitcoin Michelle Trauth, 2018-09-20 Research Paper postgraduate from the year 2018 in the subject Sociology Individual Groups Society grade 75 Distinction Bournemouth University language English abstract By the end of 2017 almost everybody has heard of Bitcoin Therefore the topic of this essay is highly relevant and aims to give an insight on Bitcoin and Blockchain technology as well as analyze the rise of Bitcoin from a socio economic viewpoint By applying the personal enterprise concept based on the neo liberal definition from Dardot and Laval 2013 this essay will look at the correlation between the increase of neoliberalism and the rise of Bitcoin By highlighting the sociological and financial circumstance that Bitcoin has emerged from the rise of Bitcoin can be explained This essay will show how decentralization the financial crisis of 2008 globalization digitization and the neo liberal mindset are the main factors that paved the way for Bitcoin and contributed to its development The essay will also look at the societal changes that occurred due to digitization to demonstrate why Bitcoin and Altcoins are increasingly popular in today s network societies

Bitcoin's potential of becoming a world currency Finn Schwarz, 2019-11-22 Seminar paper from the year 2019 in the subject Economics Finance grade 1 7 Northern Business School course International Financial Relations language English abstract In this thesis the crypto currency Bitcoin should be examined for its suitability as world currency or part of it In order to determine the potential of Bitcoin the terms currency and cryptocurrency must be explained and defined first Included in the definition of cryptocurrencies is the meaning of the Bitcoin system and the functionality will be roughly explained In this thesis the detailed technical aspects of the design of the Bitcoin system are greatly simplified and partially neglected After that follows a summary of advantages and disadvantages of cryptocurrencies in general that can be found in the literature This is primarily to gain insight into how the current perception of Bitcoin is in the public and to identify arguments that are likely to have a high impact on others opinions After the consideration of the cryptocurrency Bitcoin follows a historical discussion with the concept of the world currency It will be investigated which approaches of a world currency already existed in the recent past and which are currently available This will lead to the identification of the driving forces and challenges that have an impact on the fiscal world order Thereon the findings about the Bitcoin system will be laed against the discussion about a world currency and potentials will be derived After a conclusive summary and a critical conclusion further research opportunities in the investigated fields are finally opened

The Impact of Blockchain
