mortgage costs However if those financial markets want to continue to contribute both to economy and society the promotion of a good integer and transparent functioning of those markets is essential The proper functioning of the financial markets is largely dependent on the confidence of investors in those markets The fact that investors must be placed on an equal footing is the underlying principle on which this confidence is based Market participants must be assured to always have access to a minimum set of information before making their investment decisions In this context transparency plays an important role The price of a financial instrument is always the result of the available financial information And to have proper price formation it is essential that all the stakeholders have equal access to the relevant information as much as possible A lot of regulations have already been introduced in this area Yet the effectiveness of those regulations can be questioned For example directors can make use of certain non public information to trade in securities They abuse their superior knowledge and consequently other investors regard this as unfair trading Due to those unfair practices other potential investors will turn their back to the financial markets Insider trading is likely to undermine the investors confidence in the market and may jeopardise the proper functioning of the market Therefore insider trading should be prohibited But in most cases law enforcement authorities face difficulties in proving the offenses Hence insider trading is a social evil and remains difficult to combat This research essay will compare the current legislation on insider trading in New Zealand Australia and the EU In the end it will be clear that the fundamental differences between the three jurisdictions remain off

**The Economic Structure of Corporate Law** Frank H. Easterbrook, Daniel R. Fischel, 1991-10 The authors argue that the rules and practices of corporate law mimic contractual provisions that parties would reach if they bargained about every contingency at zero cost and flawlessly enforced their agreements But bargaining and enforcement are costly and corporate law provides the rules and an enforcement mechanism that govern relations among those who commit their capital to such ventures The authors work out the reasons for supposing that this is the exclusive function of corporate law and the implications of this perspective
