Abstract: The emergence of transaction cost economics (TCE) in the early 1970s with Oliver Williamson's successful reconciliation of the so-called neoclassical approach with Herbert Simon's organizational theory can be considered an important part of the first cognitive turn in economics. The development of TCE until the late 1980s was particularly marked by treating the firm as an avoider of negative frictions, i.e., of transaction costs. However, since the 1990s TCE has been enriched by various approaches stressing the role of the firm in creating positive value, e.g., the literature on modularity. Hence, a second cognitive turn has taken place: the firm is no longer only seen as an avoider of negative costs but also as a creator of positive knowledge.

Keywords: transaction cost economics, Oliver Williamson, theory of the firm, modularity literature, cognitive turn

Transaction cost economics (TCE) has a long past since what we generally speak of as 'transaction costs' have been present in economic discourse for centuries. The past of TCE is rich in metaphors describing the idea of transaction costs, but the one with the most profound impact on the later development of TCE was the notion of frictions. That metaphor is strongly connected to the further metaphor of the market as a machine whose deviations from ideal functioning is characterized by frictions (e.g., Walras 1893). Therefore, the study of the past of TCE is guided by the study of its metaphors and particularly that of mechanical

Transaction Cost Economics Recent Developments:

Transaction Cost Economics Claude Ménard, 1997 This important new book deals with some of the most fundamental issues of transaction cost economics It focuses on the analysis of the internal nature and characteristics of organizations and on the subtle interactions between institutional environment and governance structures over time Transaction Cost Economics investigates the nature of contractual arrangements involved in large organizations the configurations of corporations the modes of governance implemented and the respective role of different constituencies The second series of problems addressed in the book concerns the interaction between the institutional environment and governance structures over time with special emphasis on the Russian privatization programme and the narcotics market These twin analyses substantiate the distinction between private and public ordering The book is strongly oriented towards increasing the operationalization of the concepts of transaction cost economics The book will be essential reading for everyone interested in the new institutional economics and by recent developments in the theory of contracts in transaction costs economics and in organisation theory Because of its emphasis on potential applications it will also be of interest to readers from management science and those involved in the analysis of economies in transition *The History of Transaction Cost Economics and Its Recent Developments* Lukasz Hardt, 2009 The emergence of transaction cost economics TCE in the early 1970s with Oliver Williamson s successful reconciliation of the so-called neoclassical approach with Herbert Simon s organizational theory can be considered an important part of the first cognitive turn in economics The development of TCE until the late 1980s was particularly marked by treating the firm as an avoider of negative frictions i e of transaction costs However since the 1990s TCE has been enriched by various approaches stressing the role of the firm in creating positive value e g the literature on modularity Hence a second cognitive turn has taken place the firm is no longer only seen as an avoider of negative costs but also as a creator of positive knowledge **Recent Developments in the Theory of Industrial Organization** Alfredo Del Monte, 2016-07-27 New forms of organisation and market behaviour are emerging to replace and reshape older forms This has produced great uncertainty in industrial organization theory The purpose of this volume is to review and present some of the new approaches developed in industrial organization The material is organised into four sections recent approaches to Industrial Organisation the behaviour of individual firms and the characteristics of industrial systems as a whole new theories of the firm and market structure and technical progress and market structure some special issues *Contextual Development Economics* Matthias P. Altmann, 2010-11-16 Poverty still persists in today s low income countries despite decades of international aid and extensive research on the determinants of growth and development The book argues that meeting this challenge requires a holistic understanding of the context specific factors that influence economic behavior and structures in poor countries Contextual Development Economics approaches this task by offering a methodology that allows analysing the dynamic interrelations between economic cultural and historical determinants of economic life in low income

countries The book starts with an empirical inquiry into the economic characteristics of low income countries that create the context by which the specific forms of organising economic activity in these countries are determined It then looks at how different generations of development economists sought to explain economic realities in low income countries from the 1940s through today The book finally synthesises the results from this empirical and methodological analysis with insights from an inquiry into contributions of the German Historical School from which it borrows the concept of the economic style as a methodological alternative to the universal and hence often irrelevant models of mainstream development economics This book offers a promising perspective for the future of development economics that will be of interest to researchers and development practitioners alike It will also be relevant for academics and students with an interest in applications of the method and concepts of the Historical School to contemporary problems Transaction Cost Economics Oliver E.
