a fruitful but complex activity that needs better understanding and more careful guidance This book is unique in its emphases on original research Eight of the 14 chapters are empirical studies published for the first time including classroom based case studies experimental research and think aloud protocol analysis In every chapter consideration is given to the pedagogical implications and possible applications of the research findings Lengthy editorial comments at the end of each chapter reinforce this practical concern

Teaching Children to Read Douglas Ray Reutzel, Robert B. Readers and Writers in the Middle Grades Martha Combs, 2003 The second edition of this popular book for grades 4 8 again reflects the author s emphasis on teaching reading and writing from a literature based perspective and engaging middle grades learners in integrated literacy experiences Coverage has been revised to meet the growing need to address early adolescents who still struggle with becoming proficient readers and writers Taking a holistic interdisciplinary approach to literacy development Combs deftly balances ideas for using authentic children s literature with techniques for making the most of the basal approach providing a rich mix of classroom tested models and examples that will serve future teachers well in their first classrooms and every classroom thereafter For future and practice elementary school reading teachers
