The Constitution of Society Anthony Giddens, 1986-03-25 It is likely that this book will be regarded as the most important piece of grand sociological theory in English of the past decade Mark Poster University of California This book will take its place alongside such major statements of sociological theory as those of Parsons and Habermas Anyone interested in the state of the social sciences today the character of social theory or the relevance of philosophy to social theory will now find it essential to grapple with Giddens's bold and incisive book Richard Bernstein Haverford College USA Anthony Giddens's new book is the fullest presentation yet of his theoretical views it has the lean sparse utterly serious craftsmanlike qualities we have learned to expect from its author and which make it a real pleasure to read Dennis Wrong Times Higher Education Supplement

Structuration Theory Rob Stones, 2017-03-16 This important text argues for a strong notion of structuration theory in contrast to the seminal but more abstract and relatively under developed project represented by Anthony Giddens's writings Emphasis on the duality of structure is placed at the centre of the tradition It is argued that the distinctive power of structuration theory lies in its potential to critically investigate a specific range of in situ questions Structuration Theory produces a synthesis that draws on Giddens's work on other versions of the structuration problematic and on key empirical uses of the approach The final chapters make use of extended case examples to illustrate the critical power of strong structuration

Joint Venture Agreements in the Qatari Gas Industry Talal Abdulla Al-Emadi, 2019-03-29 This book addresses a question of importance for both theory and practice: Why are joint venture agreements preferred over other types of agreements such as concession agreements, service contracts and production sharing agreements in the Qatari gas industry? On a theoretical level, the author analyses this decision-making process by developing an approach that integrates a micro-level analysis, more specifically within international oil companies, with a macro-level analysis that springs from the organisational culture of the Qatari gas industry. At the micro level, the author proposes John Dunning's eclectic paradigm as one set of theoretical ideas to explain one element of the decision-making process leading to the preference for joint venture agreements, that is, that of international oil companies. At the macro level, the author proposes Antony Giddens' structuration theory as another set of theoretical ideas to explain another part of this decision-making process, that is, how it is being shaped by the organisational culture of the Qatari gas industry. On an empirical level, the proposed book applies a combination of a micro-economic approach such as Dunning's eclectic paradigm with a macro-sociological approach such as Giddens' structuration theory by empirical investigation. Grounded on a qualitative strategy that focuses on the meaning-making which brings together different perspectives of this decision-making process, including those of international oil companies and the organisational culture of the Qatari gas industry, the proposed book utilises a case study design named the case of the Qatari gas industry. The author employs a triangulation of data collection techniques to access empirical data, analysing official documents and semi-structured interviews. A sample of the interview questions are included in an appendix to the proposed book. In line with the qualitative nature of this proposed book, a thematic analysis is adopted to interpret data based on Dunning's eclectic paradigm at the micro level and Giddens' structuration theory at the macro level. In doing so, this book connects theory with practice by investigating the preference for joint venture agreements in the case of the Qatari industry by the combined application of one of the most effective frameworks for explaining foreign direct investment, named Dunning's eclectic paradigm, along with the most complex sociological framework that offers a rich definition of organisational culture, named Giddens' structuration theory. Audience could include academics, professionals and graduate and senior undergraduate students.
