## **Structure Of Spherical Buildings:**

*The Structure of Spherical Buildings* Richard M. Weiss, 2003 This book provides a clear and authoritative introduction to the theory of buildings a topic of central importance to mathematicians interested in the geometric aspects of group theory Its detailed presentation makes it suitable for graduate students as well as specialists Richard Weiss begins with an introduction to Coxeter groups and goes on to present basic properties of arbitrary buildings before specializing to the spherical case Buildings are described throughout in the language of graph theory The Structure of Spherical Buildings includes a reworking of the proof of Jacques Tits s Theorem 4 1 2 upon which Tits s classification of thick irreducible spherical buildings of rank at least three is based In fact this is the first book to include a proof of this famous result since its original publication Theorem 4 1 2 is followed by a systematic study of the structure of spherical buildings and their automorphism groups based on the Moufang property Moufang buildings of rank two were recently classified by Tits and Weiss The last chapter provides an overview of the classification of spherical buildings one that reflects these and other important developments

Shell Structures, Theory and Applications Wojciech Pietraszkiewicz, Czeslaw Szymczak, 2026-02-20 Shells are basic structural elements of modern technology Examples of shell structures include automobile bodies domes water and oil tanks pipelines ship hulls aircraft fuselages turbine blades loudspeaker cones but also balloons parachutes biological membranes a human skin a bottle of wine or a beer can This volume contains full texts of over 100 papers presented by specialists from over 20 countries at the 8th Conference Shell Structures Theory and Applications 12 14 October 2005 in Jurata Poland The aim of the meeting was to bring together scientists designers engineers and other specialists in shell structures in order to discuss important results and new ideas in this field The goal is to pursue more accurate theoretical models to develop more powerful and versatile methods of analysis and to disseminate expertise in design and maintenance of shell structures Among the authors there are many distinguished specialists of shell structures including the authors of general lectures I V Andrianov Ukraine V A Eremeyev Russia A Ibrahimbegovic France P Klosowski Poland B H Kr plin Germany E Ramm Germany J M Rotter UK and D Steigmann USA The subject area of the papers covers various theoretical models and numerical analyses of strength dynamics stability optimization etc of different types of shell structures their design and maintenance as well as modelling of some surface related mechanical phenomena

**The Design of Building Structures** Wolfgang Schueller, 1996 Rather than relying on separate literature in the fields of structural engineering architecture construction and history this text presents the field of structures holistically in terms of building and architecture Buildings are studied from all points of view geometrical aesthetic historical functional environmental and construction providing the broadest treatment of structures available Descriptive analytical and graphical treatment of topics are presented with nearly equal emphasis Numerous case studies throughout exemplify structural concepts and develop a feeling for structure and form instead of supporting specific architectural styles or structural

acrobatics Teaching in the context of building structure and form i e low rise high rise long span etc allows students to understand structures on real not abstract mathematical terms Structural systems i e frames arches space frames soft shells etc and how they aid in making space and enhancing the formal presentation of a structure are discussed in detail Chapter 3 deals with approximate design methods for steel wood reinforced concrete and prestressed concrete according to the

**Progress in Structures** Xin Gang Zhou, Ming Jin Chu, Jin Ming Liu, Shu Ying Qu, Hai Tao Fan, 2012-05-14 Selected peer reviewed papers from the 2nd International Conference on Civil Engineering Architecture and Building Materials CEABM 2012 May 25 27 2012 Yantai China

**Advances in Civil Structures** Li Tian, 2013-08-08 Selected peer reviewed papers from the 2013 International Conference on Civil Architecture and Building Materials 3rd CEABM 2013 May 24 26 2013 Jinan China

Structure and Properties of Building Materials V.I. Bolshakov, Leonid I. Dvorkin, 2016-04-13 This book is intended for a wide readership and mostly for specialists builders as well as graduate and undergraduate students of engineering sciences in universities In this book the Authors outline the general statement of structural theory and consider on its basis the interrelations of structure and properties of major groups of building materials By generalizing the data of numerous studies the Authors refer to and analyze the results obtained by them in the Pridneprovsk Academy of Construction and Architecture and the National University of Water Management and Environmental Sciences Ukraine

**Exposed Structure in Building Design** Charles H. Thornton, 1993 Exposed structure combines beauty functionality and economy in high rise buildings sports facilities schools atriums garages industrial plants and rail and air terminals all over the world This definitive sourcebook brings together for the first time in a single volume the processes concepts and materials needed for exposed structure Filled with photographs and drawings of award winning buildings it explores the decision making process as experienced by nineteen leading designers Also it highlights the characteristics of exposed structure when designing for durability and economy The introduction identifies exposed structure in many well known contemporary buildings and recent innovations in structural systems and architectural forms as well as the historical development are explained Readers will find unique conversations with top architects as they explore their choice to expose structure or why they decline to expose structure Included are memorable comments by Edward Larrabee Barnes John M Y Lee Alfredo De Vido James Ingo Freed Gyo Obata Cesar Pelli Kevin Roche Richard Rogers and Bernard Tschumi In addition prominent structural engineers discuss in lively detail how they have worked out the politics the process and the technical challenges of exposing structure Showcased are the innovative ideas of Eli Cohen Vincent DeSimone Eugene J Fasullo Hal Iyengar William LeMessurier Matthys Levy Walter P Moore Peter Rice Leslie E Robertson and Loring A Wyllie Exposed Structure in Building Design provides technical summaries and case studies of design problems and solutions of exposed concrete steel and wood structures Aluminum and other materials are discussed too There is up to date coverage of the latest materials and structural systems of details to handle temperature differentials and of designs to resist corrosion fracture and fire This comprehensive

book also contains chapters dedicated to long span structures such as roofed arenas and convention halls and to the special design and maintenance requirements of parking garages With its wide ranging treatment of all types of exposed structure its informative conversations with architects and engineers and its extensive design and construction guidance Exposed Structure in Building Design is an essential sourcebook for architects engineers owners developers contractors and others interested in building design
