Freedom, Recognition and Non-Domination Fabian Schuppert, 2013-08-26 This book offers an original account of a distinctly republican theory of social and global justice The book starts by exploring the nature and

value of Hegelian recognition theory It shows the importance of that theory for grounding a normative account of free and autonomous agency It is this normative account of free agency which provides the groundwork for a republican conception of social and global justice based on the core ideas of freedom as non domination and autonomy as non alienation As the author argues republicans should endorse a sufficientarian account of social justice which focuses on the nature of social relationships and their effects on people s ability to act freely and realize their fundamental interests On the global level the book argues for the cosmopolitan extension of the republican principles of non domination and non alienation within a multi level democratic system In so doing the book addresses a major gap in the existing literature presenting an original theory of justice which combines Hegelian recognition theory and republican ideas of freedom and applying this hybrid theory to the global domain
