

What is Blockchain?

Cryptocurrency

The requested transaction will then be broadcasted to a P2P network consisting of computers, known as nodes.

A verified transaction can involve cryptocurrency, contracts, records or other information.

Someone requests a transaction.

VALIDATION:
The network of nodes validates the transaction and the user's status using known algorithms.

Once verified, the transaction is combined with other purchases to create a new block of data for the ledger.

The transaction is complete.

The new block is then added to the existing blockchain, in a way that is permanent and unalterable.

Has no intrinsic value in that is not another commodity such as gold.

Has no physical form and exists only in the network.

A central bank does not determine its supply and the network is entirely decentralized.

Technologies and Trends in the Halal Industry Nor Aida Abdul Rahman, Kamran Mahroof, Azizul Hassan, 2023-11-22

With recent technological developments touted also as Industry 4.0 numerous articles published over the years have emphasized the need to investigate the role of technology across all sectors including the halal industry. This book provides a greater understanding of the technologies, trends, and debates associated with the halal industry from different sectors such as food, logistics, pharmaceutical, tourism, medical, cosmetic, and the retail sector. The book adds substantial discussion to the issues and trends of technology applications in the halal industry as well as the theories underpinning halal technology studies. It is in four sections: an overview of the halal industry, selected theories, technology, and recent issues. The contributors explore how technology has evolved and been applied in industry and also look at how Industry 4.0 technologies like blockchain, Internet of Things (IoT), automation, machine learning, and augmented reality are being integrated in the halal supply chain process. Written by well-regarded scholars and international academics from Africa, Europe, Middle East, and Asia, this book provides expert contributions from research, regulatory, and industry perspectives. This book will interest upper-level students, scholars, academics, and practitioners in the various disciplines of tourism and travel, hospitality, food studies, marketing, pharmaceutical, and medical logistics management, Islamic studies, and information technology in the halal industry.

Digitization In Supply Chain Management: Trends, Challenges And Solutions Steven Carnovale, Sengun

Yeniyurt, 2024-03-15 Every industry has faced the tidal wave of digital that has either re-shaped or dramatically altered their modus operandi. Supporting technologies in the management information systems arena have given rise to increased end-to-end visibility, real-time access to information, and tightly controlled monitoring of deployed assets. In many industries, it is straightforward to see the impact that digital technologies have had. Finance is a great example with cash payments becoming increasingly less and less common and digital currencies increasing in prominence. Yet how has this impacted supply chain management? In a discipline that spans multiple industries, continents, and companies, are there examples that we can point to that explain how digital supply chains have become? Which aspects of supply chain management were transformed by the digital tidal wave, and which functions are lagging behind? This is what this volume seeks to address. **Trends** what are the current trends in digital or digitalization supply chain management? Ideally, these trends will include all aspects of the supply chain. That is, how has the digital revolution impacted sourcing? What are the digital trends in the logistics, warehousing, and distribution industry? How has digital impacted the operations and manufacturing industry? **Challenges** where are the diminishing returns to digital and its inclusion in the supply chain? Are there problems related to procurement and sourcing as the digital revolution takes hold? Are logistics challenges compounded in a digital world? Is manufacturing more streamlined, or are there additional complexities that need to be addressed? **Solutions** Are the challenges all too overwhelming, or are there remedies that we can advance to cope with an ever-increasingly digital world? **Fog,**
