Assessment: Social Practice and Social Product Ann Filer,2002-11-01 Assessment has become one of the most significant areas of interest in educational policy development as well as the focus of complex political economic and cultural expectations for change Increasingly governments worldwide have become aware that curricula and teachers can be indirectly controlled through programmes of assessment Opponents of centralized systems of mass assessment claim they are ill suited to the diverse and changing needs of learners and users of assessment In this text the UK and US writers take the reader beyond the obvious functions of assessment and focus upon the roles it performs in the social structuring of society They examine the myths and assumptions that underpin assessment and testing and draw attention to its cultural context This collection is devoted explicitly to socio cultural studies of assessment and attempts to map the terrain of some 30 years of study in the field Chapters are organized thematically with background text providing comparative perspectives key issues and further reading The book provides a wide ranging structured and accessible approach to the study of socio cultural origins and impacts of assessment

Tierney, John E. Readence, 2000 This book is a compendium of strategies it is not a description of a single approach nor is it intended to be eclectic The inclusion of a strategy should not be perceived as our endorsement of that strategy There are some strategies that we view as problematic there are others about which we disagree *With Literacy and Justice for All* Carole Edelsky, 1991 This volume presents analyses of educational and research practices with the first part highlighting bilingual education and the second part focusing on whole language and progressive ways of evaluating students The book concludes by re-iterating the socio-political nature of literacy **Journal of Speech-language Pathology and Audiology**, 1997 *In Defense of Good Teaching* Kenneth S. Goodman, 1998 Is whole language the cause of the problems that beset our schools Is the debate between whole language and phonics a cover up for control of what and how students learn Is it appropriate that legislators lobbyists textbook publishers and private interest groups evaluate and promote research on teaching and learning Is Christian fundamentalism being exploited by political and economic groups Is the attack on whole language supported by research that is valid Is the issue of teaching reading now so polarized that even a balanced approach is no longer acceptable in some schools These questions have come out of the reading wars And teachers now must be articulate and knowledgeable defendants of their own positions in the debate if they are to retain control of their profession *In Defense of Good Teaching* is the whole language community's first concerted response to its attackers reveals some disturbing truths in the reading wars deliberate misrepresentation of ideas about the role of the press conflicting political agendas played out in our schools teachers and administrators marginalized for their beliefs and commercial interests dressed up as scientific research This is an alarming and enlightening book and as the dispute broadens to affect teaching of math and bilingual education it is an important book It will be invaluable to teachers who want the means and strategies to respond to criticism to analyze arguments and to defend their position More is at stake than whole language Literacy Assessment James David Cooper, Nancy D. Kiger, 2005 This text presents literacy assessment as a natural part of the instructional cycle Through the text's practical positive approach to the stages of developmental literacy preservice teachers

and reading specialists learn to assess student progress on a daily basis Case studies chapter summaries and readings for further exploration make this text accessible and informative A companion web site includes several interactive tools for instruction and learning Each Benchmark is followed by assessment and instructional strategies that help teachers apply theory to practice Comprehensive coverage includes state and national standards and assessment of second language learners Research and references highlight up to date instructional strategies including the use of technology *Psychology and Educational Practice* Herbert J. Walberg, Geneva D. Haertel, 1997 **Early Literacy Instruction** John A. Smith, Sylvia Read, 2005 This introductory K-3 literacy instruction text details authentic classroom practice by authors who have recently taught in primary and elementary classrooms Organized around a comprehensive reading and writing instructional framework the text balances the authors rich classroom experiences with a theoretical perspective The authors also share a wealth of practical teaching strategies authentic student artifacts and real teaching examples The chapter opening vignettes demonstrate real world classroom encounters the phonics and assessment chapters provide especially useful classroom guidance and the effective strategies offered to help English Language Learners and Struggling Readers in Chapter 11 and in text features throughout the book make this new text a valuable choice for teacher education
