Multi-dimensional Analysis Tony Berber Sardinha, Marcia Veirano Pinto, 2020-09-17 Multi Dimensional Analysis Research Methods and Current Issues provides a comprehensive guide both to the statistical methods in Multi Dimensional Analysis MDA and its key elements such as corpus building tagging and tools The major goal is to explain the steps involved in the method so that readers may better understand this complex research framework and conduct MD research on their own Multi Dimensional Analysis is a method that allows the researcher to describe different

registers textual varieties defined by their social use such as academic settings regional discourse social media movies and pop songs Through multivariate statistical techniques MDA identifies complementary correlation groupings of dozens of variables including variables which belong both to the grammatical and semantic domains Such groupings are then associated with situational variables of texts like information density orality and narrativity to determine linguistic constructs known as dimensions of variation which provide a scale for the comparison of a large number of texts and registers This book is a comprehensive research guide to MDA

Constructing Interpersonality Rosa Lorés Sanz, Pilar Mur-Dueñas, Enrique Lafuente-Millán, 2010 The view that academic discourse is by definition impersonal has long been superseded It seems unquestionable now that the interpersonal component of texts that is the ways in which the writers project themselves and their audience in the discourse is an essential factor determining the success of scholarly communication and has become a fundamental issue in the field of English for Academic Purposes EAP Interpersonality is the key issue around which the articles in this edited book focus on The eighteen contributions included in this volume provide a wide exploratory view of the many academic genres in which interpersonal is manifested and the various analytical approaches from which the textual manifestation of that interpersonal can be studied The varied origin of the contributors is also representative of the global interest that the issue of interpersonal arouses in the field of academic discourse analysis at an international level The present volume constitutes a highly valuable tool for applied linguists and discourse analysts with an interest in EAP as well as for students instructors and language teachers interested in academic discourse The book may also be of interest to other agents intervening in the research publication process such as translators proofreaders reviewers and editors
