**Sustainable Urban Landscapes** University of British Columbia. James Taylor Chair in Landscape and Liveable Environments, 1996 This book is about how to make our new neighbourhoods more sustainable than they are now By sustainable we mean the maintenance of the ecological health of our neighbourhoods and the provision of equitable access to affordable housing for our children We hope that this book will be of interest to everyone from the public officials and private developers who participate in developing and managing the urban landscape today to the secondary school students who will shoulder these responsibilities tomorrow This book includes four different designs for the same 400 acre site in Surrey British Columbia each design having been produced by a team of architects and landscape architects working en charrette

Design Charettes for Sustainable Communities Patrick M. Condon, 2012-09-26 A step by step guide to more synthetic holistic and integrated urban design strategies Design Charettes for Sustainable Communities is a practical manual to accomplish complex community design decisions and create more green clean and equitable communities The design charrette has become an increasingly popular way to engage the public and stakeholders in public planning and Design Charettes for Sustainable Communities shows how citizens and officials can use this tool to change the way they make decisions especially when addressing issues of the sustainable community Designed to build consensus and cooperation a successful charrette produces a design that expresses the values and vision of the community Patrick Condon outlines the key features of the charrette an inclusive decision making process that brings together citizens designers public officials and developers in several days of collaborative workshops Drawing on years of experience designing sustainable urban environments and bringing together communities for charrettes Condon s manual provides step by step instructions for making this process work to everyone s benefit He translates emerging sustainable development concepts and problem solving theory into concrete principles in order to explain what a charrette is how to organize one and how to make it work to produce sustainable urban design results Leadership for Environmental Sustainability Benjamin W.
