The ONS Productivity Handbook: A Statistical Overview and Guide NA NA, Great Britain. Office for National Statistics, 2007-07-16 ONS Productivity Handbook a Statistical Overview and Guide examines the importance and relevance of economic productivity and serves as a reference on the subject Areas covered include productivity analysis within various sectors and at firm level as well as measures of labour and capital inputs *Productivity Guide: How To Get Focused At Work?* Chris Diamond, Are you getting sidetracked from your work as a result of distractions worrying wondering and curiosity Today we do not just live in the information age but in the Distractions Age There s so much going on around us but our available time seems to shrink even more I decided to create this productivity report for a few reasons 1 Busyness does not always mean productive work You ll learn how to get clean focus and improve your concentration on your tasks in order to get them done without procrastinating and postponing the important stuff Moreover you ll feel less busy and accomplish a lot more as a result 2 Most people consider multitasking as a good strategy to get things done Now that s very disturbing to me because I am going to show you how multitasking can HURT your productivity and what you have to do instead page 5 3 Most business owners hesitate about opportunities and not taking proper action to get things done I am going to show you how to battle this temptation and break free from the paralysis of fear and uncertainty that are causing inaction doubts and procrastination A good analogy of this is when you go to swim on a public swimming pool People who are about to jump in ALWAYS bother those who are already in the pool with the boring questions Is the water warm How deep is it Can I jump in What if I drown Just get in there and see for yourself The vary same hesitation is causing people to neglect opportunities for achieving a better lifestyle in their business You ll learn what you need to do to eliminate this hesitation and jump in the pool with other successful people You become who you surround yourself with 4 A lot of people react on things based an emotional impulse I am going to outline the difference between REACTION and RESPONSE page 7 That s because if you can t distinguish the urgent from the important you are less likely to achieve the result you want 5 Most people confuse activity with productivity If you understand the difference between both you ll be able to focus and become dramatically more productive at your work page 7 6 Most of us have a lot that s going on in our heads We can t clearly focus on things because we have all those distracting thoughts while trying to work I am going to show you a very powerful technique that s going to solve this problem once and for all page 8 Surprisingly enough I ve learned this from Bruce Lee I do not know anything about martial arts in order to apply his principles You ll see what I mean when you get to page 8 of this productivity report 7 A lot of people today with the invention of Facebook Twitter and other time wasters on the Internet find a hard time to organize their time for work Even if you have a lot of commitments demands and obligations you are always short on time to work and do what s important to you That s why in this productivity report I am going to show you how to work more effectively spending less time to work and accomplishing a lot more as a result See page 10 What does Golden Nuggets Edition mean

Field guide to improve crop water productivity in small-scale agriculture Food and Agriculture Organization of the United Nations, 2020-04-01. By 2050, the world's population will reach 9.1 billion, which requires an increase of food production by 70 percent compared to 2005. FAO 2018. Nearly all the increase will occur in developing countries where agriculture plays a major role to provide employment, income, and to improve food security. One of the major challenges of increasing food supply is the limited water resources. Agriculture, as the driver of freshwater exploitation, has therefore to be transformed into more resource-efficient production. FAO 2003. The world's limited freshwater resources are potentially threatened by the expansion of agriculture. Increasing the potential output per amount of water used is an appropriate practice to improve production efficiency while protecting water resources. Therefore, increasing the productivity of agricultural water use in a sustainable manner is essential to ultimately sustain the social and economic conditions of livelihoods. Crop water productivity has grown into one of the major approaches to cope with water scarcity and advance crop-water relations. The number of conceptual frameworks and implications is ample, but there is always a growing need to review the step-by-step approach. In this field guide, practical pathways are presented to provide a comprehensive approach for assessing and improving crop water productivity in small-scale agriculture. The field guide draws lessons learned in three countries: Burkina Faso, Morocco, and Uganda, within the framework of the FAO project "Strengthening Agricultural Water Efficiency and Productivity at the African and Global Level," funded by the Swiss Agency for Development and Cooperation SDC.
