

DESIGNING FOR ALL AGES & ABILITIES

Every design must meet the needs of a diverse range of potential bike riders. Across North America, however, many existing bike facility design practices are limited to only the oldest people being and exclude many who might otherwise use them.

IN AN AGE OF GROWING POPULATION that has a high percentage of people older than 50, it is essential to design bike facilities that are accessible to all. This includes people with physical disabilities, people who are pregnant, people who are recovering from an injury, and people who are recovering from a stroke. Designing bike facilities that are accessible to all is essential to making sure everyone can use them.

Urban Bikeway Design Guide

National Association of City Transportation Officials

Third Edition

The third edition of the Urban Bikeway Design Guide provides updated guidance on how to design bike facilities that are safe, sustainable, and equitable for all people.

OUR VISION

Cities where safe, sustainable, and equitable transportation systems connect communities to the resources they need to thrive
