Strategic Patent Planning For Software Companies:

Strategic Patent Planning for Software Companies Eric Stasik,2004 Strategic Patent Planning for Software Companies looks at the current patent and licensing strategies used by successful companies that develop and market software This book discusses the current status of international patent protection as regards computer implemented inventions CII explains why copyright is inadequate and describes how patents are being used by Microsoft and the Apache Software Foundation to support a wide range of business objectives Over the past decade extensions in the scope of patent protection to include computer implemented inventions have generated controversy concern and a great deal of hyperbole In Europe the debate over software patents has been bitter and rancorous and the directive to harmonize European patent law with EPO practice faces an uncertain future The business approach of this book is highlighted by a comprehensive listing of strategic business objectives which patents can be used to support You will discover how patents have become uniquely versatile business tools By examining the patent strategies employed by others you can better understand the needs of your own company and how you too can use patents to gain and maintain competitive advantages *Patent Strategy* Anthony L. Miele,2002-02-28 FROM PATENT TO PROFIT Patents and patent strategies are increasingly pertinent to the success of information age businesses from affecting valuations to gaining tax advantages to increasing the starting price per share when taking a company public Patent Strategy illustrates the impact patents can have on technology driven businesses tactical and strategic efforts Here is step by step guidance to the patent process the laws and basic strategies from a business goal perspective so that middle and upper level managers can recognize the significance of patents in relation to a particular business and can incorporate proper patent management efforts into their business framework In addition this book serves as an invaluable reference for management and executives when making patent related decisions such as whether a patent infringement study must be performed whether the budget for patent matters should be increased or decreased whether attempts should be made to license certain patent technology and whether the firm should sue for patent infringement Case studies throughout the book give you a specific business context within which to consider the concepts introduced Statistics are presented to assist you in assessing various issues planning patent strategies and implementing patent management programs *Software Patents* Knut Blind,Jakob Edler,Michael Friedewald,2005-01-01 There has been continued debate in Europe over whether to change the patentability of software or so called computer implemented inventions and to follow the US model of allowing software patents The European debate has shown a severe lack of empirical analysis on the possible impact of software patenting that goes beyond interest driven rhetoric This book seeks to address this shortcoming by taking a two fold approach Firstly a survey of German software companies provides a representative overview of both general strategies to protect inventions and opinions regarding the future IPR regime in the context of innovation strategies including the importance and use of Open Source software Secondly a series of case studies

illustrate the varying impacts that patents and other protection strategies can have in specific contexts This book provides both a theoretical overview of the economic impacts and policy implications of software patents and an empirical foundation upon which to base a discussion on how to shape the intellectual property regime for software Strategic Information Technology Plan for Fiscal Year ... publication of UNICE the European Industry ganization representing 20 million large midsize and small companies speaks a clear language Europe qualifies to roughly 60% 70% of the innovation strength of the US Japan The record unemployment in many EU countries does not c tradict this message A main reason may be given by the fact that becoming an innovative organi tion means increased openness towards the new and more tolerance towards risks and failures both challenging the inherently difficult management art of cultural change Further lacking innovativeness is often related to legal and fiscal barriers which rather hinder than foster innovative activities Yet another reason to explain Europe s notorious innovation gap refers to insufficient financial R D resources on the company as well as on the national level As a result for example hi ranking decisions on the level of the European Commission are taken to increase R D expenditures in the European Union from roughly 2% to 3% of GNP *Strategic Information Technology Plan for Fiscal Years ...
