CHAPTER 1

UNDERSTANDING HABITS

Introduction

What are habits? Habits are actions that you repeat regularly, often without thinking about them. They can be good or bad, and they can have a significant impact on your life. Understanding habits is the first step to changing them.

Why do we have habits? Habits are formed through a process called habit formation. This process involves repeating an action over and over again, which creates a neural pathway in your brain. The more you repeat the action, the stronger the pathway becomes, and the more automatic the action becomes.

How can I change my habits? Changing habits is a process that takes time and effort. It involves identifying the triggers that lead to your habits, understanding the rewards that keep you hooked, and replacing the old habits with new ones. Consistency and patience are key to successful habit change.
