The Quantum World Princeton Science Library:

The Quantum World J. C. Polkinghorne, 1984 Times of the Trinity Duane Howard Larson, 1995 After Einstein it can neither be said that time is absolute nor that eternity is timeless Indeed contemporary physics may suggest that eternity is the fullness of times Because much Christian thought still adheres to an absolute time and a timeless eternity it is all the more opaque to the emerging non mechanistic scientific worldview After reviewing theological notions of time and eternity relativity theory quantum theory and three noted cosmologists this study shows how Christian theology s revisiting of its doctrine of the Trinity can lead to a fruitful consonance with the natural sciences **A Physicist Examines Hope in the Resurrection** John F. Wilson, 2016-12-22 John Polkinghorne ordained member of the Royal Society past President of Queen s College Cambridge Knight Commander of the Order of the British Empire 2002 Templeton Prize winner theoretical physicist and theologian writes in breathless style to unfold core Christian doctrine in dialogue with science His work deftly addresses how one would interpret and commend Christian faith in the contemporary world as he elucidates the key topics in the dialogue of religion with science Polkinghorne s work addresses the hope Christians have present and future in the faithfulness of a loving God who stands alongside them today and for all eternity Eschatological hope enables and empowers Christian life and emerges in God s resurrection of Jesus from the horrific crucifixion Polkinghorne ably supports his thesis with a strong argument for the resurrection built on the kenotic acts of God His thesis sees Christian eschatology as the advent of hope the heart of faith In Christian eschatology as argued by Polkinhorne and supported in the work of Jurgen Moltmann and Nicholas T Wright Christ s presence is not some far off event but present reality **The Evangelical Counter-Enlightenment** William R. Everdell, 2021-05-21 This contribution to the global history of ideas uses biographical profiles of 18th century contemporaries to find what Salafist and Sufi Islam Evangelical Protestant and Jansenist Catholic Christianity and Hasidic Judaism have in common Such figures include Mu ammad Ibn abd al Wa hab Count Nikolaus Zinzendorf Jonathan Edwards John Wesley Jean Jacques Rousseau and Israel Ba al Shem Tov The book is a unique and comprehensive study of the conflicted relationship between the evangelical movements in all three Abrahamic religions and the ideas of the Enlightenment and Counter Enlightenment Centered on the 18th century the book reaches back to the third century for precedents and context and forward to the 21st for the legacy of these movements This text appeals to students and researchers in many fields including Philosophy and Religion their histories and World History while also appealing to the interested lay reader **In Search of Divine Reality** Lothar Schäfer, 1997-08-01 In this remarkable treatise Professor Schafer shares his conclusions from a lifelong search for evidence from quantum science of the existence of a transcendent part of physical reality combining disciplinary thought from science philosophy and religion including ethics to address the educated generalist and layman with a profound look at existence Braving controversy Professor Schafer concludes that the discovery of the phenomena of quantum mechanics has established a new covenant between the human mind and the mind

like background of the universe one that provides a home again to the homeless and meaning to seemingly pointless life In this new understanding of the world the universe must be assumed to have a moral as well as a physical order and facts and values derive again from a single source **Information, Science, and Technology in a Quantum World** ,2002

Thaxton,1994 I consider The Soul of Science to be a most significant book which in our scientific age should be required reading for all thinking Christians and all practicing scientists The authors demonstrate how the flowering of modern science depended upon the Judeo Christian worldview of the existence of a real physical contingent universe created and held in being by an omnipotent personal God with man having the capabilities of rationality and creativity and thus being capable of investigating it Pearcey and Thaxton make excellent use of analogies to elucidate difficult concepts and the clarity of their explanations for the nonspecialist for example of Einstein s relativity theories or of the informational content of DNA and its consequences for theories of prebiotic evolution are quite exceptional alone making the volume worth purchasing Dr David Shotton Lecturer in Cell Biology Department of Zoology University of Oxford Pearcey and Thaxton show that the alliance between atheism and science is a temporary aberration and that far from

being inimical to science Christian theism has played and will continue to play an important role in the growth of scientific understanding This brilliant book deserves wide readership Phillip E Johnson University of California Berkeley This book would be an excellent text for courses on science and religion and it should be read by all Christians interested in the relationship between science and their theological commitments J P Moreland Professor of Philosophy Talbot School of Theology Biola University
