International Perspectives on Early Years Workforce Development Verity Campbell-Barr, Janet Georgeson, 2025-02-28

This up to date text is suitable for students on all early years and early childhood courses as well as interested practitioners. It looks at the current structure of the early childhood education and care ECEC workforce in different countries each of which represents a distinct philosophical tradition tracing what has shaped this structure and examining how politics and policy have moulded the workforce over time. Each chapter analyses historical philosophical and political developments in the respective country and looks at key theorists the concepts of childhood that have shaped the workforce and the pedagogical approach. The unique aspects of each country are highlighted along with a consideration of what the future might hold for the workforce. Students and practitioners will achieve a more critical understanding of current practice and the beliefs which underpin particular pedagogical approaches while being encouraged to question their own values and practice.

International Handbook of Early Childhood Education Marilyn Fleer, Bert van Oers, 2017-10-10. This international handbook gives a comprehensive overview of findings from longstanding and contemporary research theory and practices in early childhood education in the Northern and Southern hemispheres. The first volume of the handbook addresses theory methodology and the research activities and research needs of particular regions. The second volume examines in detail innovations and longstanding programs curriculum and assessment and conceptions and research into child family and communities. The two volumes of this handbook address the current theory methodologies and research needs of specific countries and provide insight into existing global similarities in early childhood practices. By paying special attention to what is happening in the larger world contexts the volumes provide a representative overview of early childhood education practices and research and redress the current North South imbalance of published work on the subject.
