**The Global ISBN Handbook** Azhar ul Haque Sario, 2025-10-30. Have you ever wondered why that 13-digit number on the back of a book costs 125 in the United States but is completely free in Canada and India? This book, *The Global ISBN Handbook*, is your 2025 guide to the International Standard Book Number. It explains everything about this global fingerprint for books. The ISBN is the most important cornerstone of the publishing industry. It started as a simple warehouse tool in the 1960s. Now it is a complex digital identifier used in over 200 countries. This handbook deconstructs the entire system. It uses 15 distinct national case studies to do this. You will learn how the old 10-digit system changed to the new 13-digit one. We break down the five parts of the ISBN from the Bookland prefix to the final check digit. The book explores the global governance framework starting with the International ISBN Agency. Then it dives deep into how different countries run their systems. You'll see the privatized high-cost model in the United States. You'll compare it to Canada's free government-run system. We explore the industry-led models in Brazil and Germany. We look at government-run systems in Mexico and India. We even cover the unique case of China where the ISBN is not a simple identifier but a state-controlled publication license. The book also examines the systems in the UK, France, Russia, Japan, Australia, South Africa, Nigeria, and Egypt. Many books and websites can tell you how to get an ISBN. This handbook is the only resource that explains why the process is so different everywhere you look. It moves beyond a simple how-to and provides a true global analysis. It directly compares the privatized-for-profit models in the US and UK against the free public good systems in Canada and South Africa. You won't just learn the price; you will understand the cultural policies, market structures, and legal philosophies that shape that price. This book shows how the ISBN is a global mirror. It reveals how a simple number can be a commercial product in one nation, a tool of cultural policy in another, and an instrument of state control in a third. This comparative insight is the missing piece for any author, publisher, or researcher trying to navigate the complex international publishing market.

Disclaimer: This handbook is an independently produced resource for commentary and analysis. The author has no affiliation with the International ISBN Agency, R. R. Bowker Library and Archives Canada, the National Press and Publication Administration, or any other national ISBN agency. This work is independently produced under the principle of nominative fair use.

**The Next Crisis** Danny Dorling,2025-05-13 Every month surveys around the world ask people to tell them what they are really thinking The results are at times reassuring some times chilling and often unexpected In The Next Crisis leading UK geographer Danny Dorling unpacks polling data and shows that our global crises are often very different from what s in the headlines and that we need to take these issues very seriously Dorling explores our main concerns about the world in order of urgency What the cost of living shows us about inequality How the connection between employment and immigration is used to stir up insecurity Why we are frightened by distant wars How corruption corrodes care What we should really be worried about when it comes to climate change including what the scientists get wrong about people s fears And finally how the great unknown unknowns dictate the way we think about the future and what we should be less afraid of pandemics asteroids tsunamis even each other The Next Crisis uses the most up to date re search to redraw our assumptions about where our greatest threats come from Dorling offers a series of solutions for tackling or at the very least coming to terms with our uncertain future

**Speculative Cartographies** Grzegorz Czemieli,2026-03-09 Grzegorz Czemieli examines ways in which cartography has been imaginatively reclaimed in philosophy literature and art to develop new ontologies that challenge unreflective anthropocentrism and capitalist driven globalization Speculative cartographies strive to account for material processes occurring across various spatiotemporal scales In effect they open alternative visions of the global situating humanity in the planetary context and responding to today s environmental crises Exploratory map makers enquire about the relationship between people and Earth transforming notions of humanism and nature in the process Such efforts contribute to the development of a materialist cartographical imagination necessary to interrogate capitalist realism and envision sustainable futures
