Productivity Guide Global Trend:

Global Trends in Agricultural Demand, Productivity, and Supply, 1978-1986 Mary E. Lassanyi, 1987 *Brands as Productive Assets: Concepts, Measurement, and Global Trends* World Intellectual Property Organization, Carol A. Corrado, Janet X. Hao, 2014 The paper looks at brands from an economic point of view It defines concepts analyzes the conditions under which brands are long lived productive assets and contribute to economic growth and reviews the measurement of investment in brands It finds that a productive role for brands is consistent with assumptions used in the economic analysis of innovation Finally it offers an analysis of economic development that suggests branding rises with growth

The SDGs and food system challenges: Global trends and scenarios toward 2030, 2024-02-12 Progress toward reducing global hunger has stalled since the mid 2010s In fact hunger is on the rise again driven by slowing economic growth and protracted conflict intensified by the impacts of climate change and economic shocks in many low and middle income countries In addition food systems worldwide have suffered disruptions in recent years caused by the COVID 19 related global recession and associated supply chain disruptions and exacerbated by the war in Ukraine These factors have also jeopardized efforts at addressing the challenges to food system sustainability The 2030 Agenda for Sustainable Development and the related sustainable development goals SDGs defined in 2015 recognize these challenges and set ambitious targets to end hunger and all forms of malnutrition and to make agriculture and food systems sustainable by 2030 Many other fora have restated and reiterated these ambitions including the 2021 United Nations Food System Summit UNFSS While governments around the world have subscribed to these ambitions collectively they have not been very specific as to how to achieve the SDGs and related goals and targets except for three means of implementation MOI involving i increases in research and development ii reductions in trade distortions and iii improved functioning and reduced volatility in food markets This paper is part of a wider effort at assessing the international community's follow through on the above ambitions and the related implicit or explicit commitments made toward action for achieving them While not presenting new research findings we bring together available evidence and scenario analyses to assess the progress made toward the ambitions for transforming food systems the actions taken in regard of the internationally concerted agenda and the potential for accelerating progress The number of hungry people in the world has risen from 564 million in 2015 when the SDGs were agreed to 735 million in 2022 While declines to between 570 and 590 million by 2030 are projected this is far above the 470 million projected in the absence of the COVID 19 pandemic and the Ukraine war The share of the world's people unable to afford healthy diets is projected to decline from 42 percent in 2021 to a still far too high 36 percent by 2030 On the means of implementation levels of spending on agricultural research and development have increased particularly in key developing countries such as Brazil China and India However rates of investment remain too low for comfort particularly in low income countries Also little progress has been made in reducing agricultural trade distortions and many countries continue to use trade policy measures

such as export restrictions which have proven to increase the volatility of both world and domestic food prices We conclude that progress toward the SDG 2 targets has been dismal and that the food system challenges have only become bigger But we also find that it is not too late to accelerate progress and that the desired food system transformation can still be achieved over a reasonable timespan and at manageable incremental cost Doing so will require unprecedented concerted and coherent action on multiple fronts which may prove the biggest obstacle of all

Global Trends in Real Estate Finance
Graeme Newell, Karen Sieracki, 2009-10-08 To operate effectively in today's dynamic global real estate markets it is essential to understand the complex processes that underpin them This up to date work which brings together contributions from industry and academic experts from around the world is a valuable corollary to effective investment decision making within the property sector and will be of interest to post graduate property students researchers and practising real estate investors Recent years have seen some rapid developments in the global scale and structure of real estate markets Such transformations have been paralleled by significant changes in the financial structures and processes that serve these markets including sophisticated new investment and finance structures and products Examples of these include the real estate investment trusts REIT products that have been developed in USA Europe and Asia the range of unlisted products emerging in UK and Europe and the innovative financing structures being developed in many countries *Global Trends in Real Estate Finance* addresses this emerging complexity and sophistication in contemporary real estate markets by discussing the history merits and implications of a range of products and processes Also examined are the changes in the practices and environment needed to ensure the success of these property products including increased disclosure corporate governance market transparency and improved skills base Chapters are written by leading international contributors both academic and practitioner The context is explicitly international with a focus on UK Europe Asia Australia and the USA The aim is to identify specific market areas to describe the key innovations rather than simply providing a description of various geographical markets

Guidelines on irrigation investment projects Food and Agriculture Organization of the United Nations, 2019-04-15 Irrigation has been and will continue to be an agricultural and rural investment priority Development of the irrigation sector faces multiple challenges including water scarcity and degradation competition over shared resources and the impact of climate change Innovations are needed to address these challenges as well as emerging needs and to promote productive equitable and sustainable water management These guidelines produced by an inter agency team highlight experiences and lessons learned from global irrigation investment operations They introduce innovative approaches tools and references and provide practical guidance on how to incorporate or apply them at each stage of the investment project cycle The guidelines will be a useful resource for national and international professionals involved in irrigation investment operations
