The Use & Misuse of Computers in Education Allan B. Ellis,1973 **The Use and Misuse of Computers in Education** Felipe Barrera-Osorio,2016 This paper presents the evaluation of the program Computers for Education The program aims to integrate computers donated by the private sector into the teaching of language in public schools The authors conduct a two year randomized evaluation of the program using a sample of 97 schools and 5 201 children Overall the program seems to have had little effect on students test scores and other outcomes These results are consistent across grade levels subjects and gender The main reason for these results seems to be the failure to incorporate the computers into the educational process Although the program increased the number of computers in the treatment schools and provided training to the teachers on how to use the computers in their classrooms surveys of both teachers and students suggest that teachers did not incorporate the computers into their curriculum *Research in Education* ,1971 *A Study of Computer Use and Literacy in Science Education* Minnesota Educational Computing Consortium,1980 *The Computing Teacher* ,1974 *Research in Education* ,1971 *Resources in Education* ,1981 *Handbook of Reading Research* P.
