The Logic Of Relationship:

The Logic of Relationship Frederick S. Johnston,1968 Real-time Relationships Stefan Molyneux,2017-11-23 The first commandment of Socrates was Know Thyself Real Time Relationships provides the second commandment Speak Thy Truth The first virtue is always honesty but speaking immediate emotional experiences in intimate relationships can be enormously challenging Real Time Relationships addresses the how and the why of true intimacy in love friendship politics and work Bring the power of authentic honesty to all of your personal relationships and reap the rewards of love loyalty and security for the rest of your life *The Logic of Relationship* Frederick S. Johnston (Jr),1968 **The Logic of the Laws** David S. Moyer,2012-12-11 This study is directed towards providing basic background material for the understanding of South Sumatran social organisation To this end four legal codes from the first half of the nineteenth century are presented and analysed The method used in the analysis is a modification of that used by Levi Strauss for the analysis of myth The author concludes by stating Out of these detailed analyses the most significant phenomenon to emerge is the fact that a relatively small number of formal properties are distributed through a large number of structures within a single legal code and because of their formal similarities these structures are mutually reinforcing The Logic of Social Science James Mahoney,2021-08-17 Mahoney s starting point is the problem of essentialism in social science Essentialism the belief that the members of a category possess hidden properties essences that make them members of the category and that endow them with a certain nature is appropriate for scientific categories atoms for instance but not for human ones revolutions for instance Despite this much social science research takes place from within an essentialist orientation those who reject this assumption goes so far in the other direction as to reject the idea of an external reality independent of human beings altogether Mahoney proposes an alternative approach that aspires to bridge this enduring rift in the social sciences between those who take a scientific approach and assume that social science categories correspond to external reality and thus believe that the methods used in the natural sciences are generally appropriate for the social sciences and those who take a constructivist approach and believe that because the categories used to understand the social world are humanly constructed they cannot possibly follow the science of the natural world As the name suggests scientific constructivism brings in aspects of both views and attempts to unite them Drawing from cognitive science it focuses on using the rational parts of our brain machinery to overcome the limitations and deeply seated biases such as essentialism of our evolved minds Specifically Mahoney puts forth a set theoretic analysis that focuses on sets of categories as they exist in the mind that are also subject to the mathematical logic of set theory He spends the first four chapters of the book establishing the foundations and methods for set theoretic analysis the next four chapters looking and how this analysis fits with the existing tools of social science and the final four chapters focusing on how this approach can be used to study and understand cases **Psycho-Logical Relationships** Dimi Flamouris,2019-10-07 What would happen if your best friend were a psychologist If he or she could give

you the clear and practical advice you need on how to deal with relationship problems What would your real life discussions on issues such as the following sound like Why do I always attract such partners I have tried so many partners When am I going to find the right one I have told my partner a million times Why won't he listen Why do I feel so stuck in this relationship and cannot make up my mind Why can't I get over my ex I keep getting involved in long distance relationships Why is that Why do I have to be the one doing everything How can I be happy These are just some of the topics discussed in this highly creative and original book Dimi Flamouris has a degree in Mathematics a PhD in Finance a career in investment banking and a further degree and career in Psychology Through clever everyday dialogues Dimi Flamouris dubbed by many as the Irvin Yalom of Greece ingeniously combines psychology and structured logic approaching the self knowledge and relationship problems that occupy our emotional world through a uniquely original standpoint In twelve independent stories this book explores in a simple yet thorough way the deeper relationship issues we all face An essential practical guide not only on how to have the best relationship but also on how to understand one's self It is one of the best relationship books for guys and for women offering applied help for relationship problems and it has already been voted as one of the Ten Best Well Being Books in Greece in 2018 Congratulations on your book It's the best book of its kind in my opinion Incredible help Thank you Nicky V I didn't just enjoy reading your book It has been one of those moments in my life that I know have defined and changed me in a positive and rejuvenating fashion Ersi A Such an enlightening book I related with almost all the stories Kelly F I love your book I read it again and again so as not to forget to look after myself more than I look after others Maria P
