Hermes,1998-05-01 Truce Tent and Fighting Front Walter G. Hermes,2005 Truce Tent and Fighting Front covers the last two years in the Korean War and treats the seemingly interminable armistice negotiations and the violent but sporadic fighting at the front The scene therefore frequently shifts from the dialectic propaganda and frustrations at the conference table to the battles on key hills and at key outposts The author presents a solid and meaningful reconstruction of the truce negotiations he develops the issues debated and captures the color of the arguments and the arguers The planning and events that guided or influenced the proceedings on the United Nations side are thoroughly explained The volume abounds in object lessons and case studies that illustrate problems American officers may encounter in negotiating with Communists Problems encountered by the U N high command in handling recalcitrant Communist prisoners of war within the spirit and letter of the Geneva Convention are explained with clarity and sympathy Truce Tent and Fighting Front is offered to all thoughtful citizens military and civilian as a contribution to the literature of limited war Hal C Pattison Brigadier General USA Chief of Military History Truce Tent and Fighting Front Walter G. the development and use of increasingly complex and powerful military systems and technologies In the process the art of war has truly become the art of combined arms warfare in which infantry artillery air support intelligence and other key elements are all coordinated for maximum effect Nowhere has this trend been more visible than in the history of twentieth century warfare Originally published as an essential in house study for U S Army officers during the 1980s this much revised and expanded edition remains the most complete study available on the subject Rewritten with a much wider readership in mind it both retains its enormous practical utility for military professionals and provides a valuable and appealing introduction for scholars and general readers Jonathan House author of the original work brings the story of combined arms up to the present covering among other things Desert Storm the war in Chechnya and the rise of smart weapons and related technologies He traces the evolution of tactics weapons and organization in five major militaries American British German Russian and French over 100 years of warfare Revealing both continuities and contrasts within and between these fighting forces he also provides illuminating glimpses of Israeli and Japanese contributions to combined arms doctrine Expanding his insightful analysis of the world wars and the wars in Korea and Vietnam House also offers much new material focused on the post Vietnam period Throughout he analyzes such issues as command and control problems of highly centralized organizations the development of special operations forces advances in weapons technology including ballistic and anti ballistic missile systems the trade offs involved in using heavy versus light armed forces and the enduring obstacles to effective cooperation between air and land forces His strong critique of the air superiority propaganda that came out of the Gulf War is sure to spark some heated debates Rigorously comparative House s study addresses significant questions about how nations prepare for war learn or don t learn its harsh lessons and adapt to changing times and technologies Unique in the annals of the literature on warfare it will be the standard work on this subject for a long time to come

*Mao's Military Romanticism* Shu Guang Zhang,1995 Zhang argues that war in Korea offered Mao yet another opportunity to expand and consolidate his political power at home while at the same time uniting the Chinese proletariat against Yankee imperialism and proving to the international community that China had arrived as a major world power

*Americans and Chinese at the Korean War Cease-fire Negotiations, 1950-1953* Pingchao Zhu,2001 This study applies the most recently released government documents from Russian and Chinese archives and updated English scholarship to the analysis of both US and Chinese diplomatic activities

**American Foreign Relations Since 1600** Robert L. Beisner,2003 In this book a team of distinguished historians has culled the most important published and unpublished works in U S diplomatic literature and thoroughly annotated them The work comprehensively covers five centuries from America s colonial era to the end of the 20th century with half the entries on works published since the first edition and nearly half on post World War II subjects

**Blitzkrieg to Desert Storm** Robert Michael Citino,2004 When Germany launched its blitzkrieg invasion of France in 1940 it forever changed the way the world waged war Although the Wehrmacht ultimately succumbed to superior Allied

firepower in a two front war its stunning operational achievement left a lasting impression on military commanders throughout the world even if their own operations were rarely executed as effectively Robert Citino analyzes military campaigns from the second half of the twentieth century to further demonstrate the difficulty of achieving decisive results at the operational level Offering detailed operational analyses of actual campaigns Citino describes how UN forces in Korea enjoyed technological and air superiority but found the enemy unbeatable provides analyses of Israeli operational victories in successive wars until the Arab states finally grasped the realities of operational level warfare in 1973 and tells how the Vietnam debacle continued to shape U S doctrine in surprising ways Looking beyond major power conflicts he also reveals the lessons of India s blitzkrieg like drive into Pakistan in 1971 and of the senseless bloodletting of the Iran Iraq War Citino especially considers the evolution of U S doctrine and assesses the success of Desert Storm in dismantling an entrenched defending force with virtually no friendly casualties He also provides one of the first scholarly analyses of Operation Iraqi Freedom showing that its plan was curiously divorced from the realities of military history grounded instead on nebulous theories about expected enemy behavior Throughout Citino points to the importance of mobility especially mobilized armor in modern operational warfare and assesses the respective roles of firepower training doctrine and command and control mechanisms Brimming with new insights Citino s study shows why technical superiority is no guarantee of victory and why a thorough grounding in the history of past campaigns is essential to anyone who wishes to understand modern warfare Blitzkrieg to Desert Storm provides that grounding as it addresses the future of operational level warfare in the post 9 11 era
