Technology Of Parallel Processing:

Parallel Processing for Scientific Computing Michael A. Heroux,Padma Raghavan,Horst D. Simon,2006-01-01 Parallel processing has been an enabling technology in scientific computing for more than 20 years This book is the first in depth discussion of parallel computing in 10 years it reflects the mix of topics that mathematicians computer scientists and computational scientists focus on to make parallel processing effective for scientific problems Presently the impact of parallel processing on scientific computing varies greatly across disciplines but it plays a vital role in most problem domains and is absolutely essential in many of them Parallel Processing for Scientific Computing is divided into four parts The first concerns performance modeling analysis and optimization the second focuses on parallel algorithms and software for an array of problems common to many modeling and simulation applications the third emphasizes tools and environments that can ease and enhance the process of application development and the fourth provides a sampling of applications that require parallel computing for scaling to solve larger and realistic models that can advance science and engineering *The Technology of Parallel Processing* ,1989 **Parallel Processing in Information Systems** John Van Zandt,1992 For corporate information systems managers professionals provides basic information about the use of parallel processors in information systems Discusses the theory and benefits of parallel processing application domains such as databases and online transaction processes programming methodologies enabling technologies and other topics Annotation copyrighted by Book News Inc Portland OR *Scalable Parallel Computing* Kai Hwang,Zhiwei Xu,1998 This book covers four areas of parallel computing principles technology architecture and programming It is suitable for professionals and undergraduates taking courses in computer engineering parallel processing computer architecture scaleable computers or distributed computing
